THERMAL MANAGEMENT ETHERMO

A FAMILY BUSINESS, NOW IN ITS THIRD GENERATION

More than 50 years ago, Antonio Turati introduced his sons to this job by teaching not only the know-how, but above-all the basic matrix methods of analysis, the values and ethics that were the roots of the company.

When, in 1978, his sons founded E.T.A. S.P.A., they thought to dedicate a tribute to their father, thus calling the company “Eredi (Heirs) Turati Antonio”. So, Antonio was the first generation; then there was the second generation, the one of his founders, the three brothers who are the soul of the company... And now a valid representation of the third generation is already working in the company.

Since 1978, ETA is at your side to offer something more: a reliable, dedicated and solid company you can count on. A company ready to listen, a team of people that are committed to their job with expertise and passion. Together with you.

Our identity is made up of values and history in evolution, synergy between solid foundation and growth potential, synchrony between experience and innovation; a path that consists of skills, people who have lived a story, that are trusted by customers and business partners and that want to be “ETA”.

ETA - a reliable partner at your side.

Headquarters and production unit in Canzo (CO) Italy, focused on the first steps of the manufacturing cycle.

The Turati Family that is leading the company.
From left side: Cesare, Luigia, Aldo, Antonio, Veronica, Samanta.

THE VALUES OF A COHESIVE GROUP

Because we believe in what we create together every day

Founded in 1978, in Italy, with 40 years of experience in steel, stainless steel and extruded aluminium production, more than 200 operating staff and 30 million euro turnover, ETA Group represents a safe and recognized benchmark for the global enclosures market as a manufacturer of high quality innovative solutions for Industrial automation, Harsh environments, LV Power distribution and Information technology.

In 2016, ETA is opening its third manufacturing unit, thus proudly widening and covering a total area of 70.000m². Thanks to this new investment, ETA Group will consist of HQ, 3 manufacturing units and 1 logistic center in Italy, 1 manufacturing unit in Romania, 2 sales subsidiaries in Europe (UK and France), 1 representative office in Saint Petersburg, 1 branch office in Cyprus (for the Middle East market) and an extensive sales network throughout Italy and around the world in more than 40 countries

Production unit and logistic centre in Albavilla (CO) Italy.

Sales subsidiary in UK.

QUALITY, SUSTAINABLE INNOVATION AND FLEXIBILITY

ETA is an established company that strongly believes in evolution, whose objective is to design and produce high quality enclosure solutions, combining innovation with the experience gained over 35 years of activity.

innovation

Value of important choices: advanced technology, long-term vision, intuitions, investments and new projects.

sustainability

We act in a perspective of economic, social and environmental sustainability, according to long-medium term logics.

flexibility

Flexibility of thought in responding to the needs of a changing market and product flexibility in the customization of standard solutions.

Reliable and competent people you can rely on, constantly monitored business processes, certified products developed through careful design and implementation.

quality

YOUR SPECIAL SOLUTION WILL BE OUR STANDARD

When the standard range of enclosures doesn't meet with your application, ETA will work with you in developing a product that best suits your requirements. As your needs change, so do our capabilities: advanced machinery technology for holes and cut-outs, automatic paint systems for alternative RAL colours and finishes, skilled staff to support you in choosing the solution complying with your needs.

This to reach best results and to offer the highest levels of flexibility, efficiency and technical quality.

Did you find the appropriate solution in the ETA catalogue?	STANDARD	Thanks to our wide stock availability, simply select the accessories to complete your configuration.
The standard product needs some machining to be in line with your final application? Small batches of customised products with punching and/or special painting... now you can!	MODIFIED STANDARD	WE CAN OFFER: • Special sizes • Special finishes (RAL colours, special cycles, double colour, double layer) • Holes • Additional studs • Assembly of accessories. With the online configurator AETAS3D.
Do you have an idea? A project?	SPECIAL	Our technical department is available to design together the product that better meets your needs.

A CUSTOMER-ORIENTED COMPANY BESIDE YOU

WWW.ETA.IT

Our new website: a clean layout for a unified corporate site for HQ and Subsidiaries, designed to be easily accessible from any device (smartphone, tablet, PC) and easy to navigate. User-friendly interface, up to date contents and global communication more and more updated through the interaction with social media. Beside you wherever you are.

An online configurator designed to optimize the delivery of our standard-modified products: in a few simple steps, you can choose the product, customize it with special holes and painting, download drawings and send the production order. Everything online, without any further steps and in a few minutes!

Thanks to the advanced laser technology of the latest machinery recently installed in ETA and thanks to the use of AETAS3D, your special solution will become our standard.

FROM IDEA TO PRODUCT SOLUTIONS

Intuition, inspiration and passion: these are the values that guide us when we create a new product. To ensure the ultimate in design and quality, with Italian vision.

Our selection of standard product range from modular cabinets for the automation market to suite and monobloc cabinets, from solutions for LV distribution to PC cabinets or rack 19" solutions for telecom/networking. In addition to the ranges of cabinets we provide boxes for automation, terminal boxes and control desks. To complete the enclosure package, there are Walk-On cable conduit systems and a Suspension system for command interfaces. Also available are stainless steel solutions for potentially explosive atmospheres, EMC solutions, or enclosures for outdoor applications.

Thanks to the partnership with leading companies in their field, we provide air conditioning Solutions for control panels and Busbar systems, to offer a true one-stop-shop approach for all your enclosure and complimentary accessory requirements.

design

FROM PRODUCT CONCEPT TO PACKAGING

When protection is a must...

New packaging was introduced with the new range of suite cabinets E NUX, monobloc cabinets E MOX, compact solutions E COMP and stainless steel boxes E COR.

Designed for maximum performance in terms of protection and differentiation.

sustainability

Possibility of reuse from the distributor to the end user.

functionality

Greater protection and shock resistance.

design

Image and differentiation from the competitors. Stand out from the competition approach.

In line with the corporate philosophy of sustainability we chose to collaborate with local consortium COMIECO (Region Lombardia) who devote particular attention to reducing the environmental impact, recycling and recovery the packaging of cellulose origin.

comieco

MULTIPLIED THE EXPERIENCE

		1 INDUSTRIAL AUTOMATION
		2 HARSH ENVIRONMENTS
		3 LV ENERGY DISTRIBUTION
		4 IT BUSINESS

INNOVATION THROUGH COMMUNICATION...

In line with the company's philosophy, in recent years it has been implemented a real change of vision in the way of communicating:

- Logo - Launched in 2011, it is a symbol of the company philosophy and it is characterized by a mix of tradition - the green colour - and innovation - a dynamic lettering in order to underline our dynamism and a three-dimensional view to emphasize the concept of new horizons.
- Product Names - The "E" of ETA to feature all the product solutions and the Latin language to both emphasize our origins and communicate the product plus.
- ADV - Each product has a different layout, but consistent with each other, in order to draw the attention and to pass the technical content more effectively.
- General catalogue - Starting from today, our experience will be multiplied across 4 market segments and documentation is evolving in order to meet different targets' needs. The General Catalogue, identified with Release and a number, is presenting ETA enclosure solutions for Industrial Automation and Harsh Environments. The handbook designed for the LV Energy distribution are focused on EN-ERPOWER (Power center & MCC) range. The ABACUS catalogue for Information technology business is dedicated to cabling, server & data center applications.

We're still us, just more "smart"!

RACK 19" AND NETWORKING SOLUTIONS E NUX

Nothing is more critical than your components. At E.T.A. we are constantly aware of that. That's why everything about the new E NUX modular cabinet system is designed with these ideas in mind.

E NUX is produced as a real complete "system" of cabinets for different applications: based on the same E NUX structure (bottom + top + uprights), thanks to a wide range of standard accessories we offer specific versions, fittings and solutions for each need.

THE CABINET FOR AUTOMATION

Preserving environmental resources and increasing their value over time; investing in new manufacturing processes with a long-term vision; offering technologically advanced & high-quality enclosure solutions: this is the company philosophy, which is well represented by E NUX, the new modular cabinet system offered by E.T.A.

Innovation is deployed at multiple levels for E NUX: research for environmental protection and efficiency, investments in new high-tech machinery and energy-saving machining processes, new constructive concepts and selection of last-generation high-strength low-alloy steel with high-performance mechanical properties. E NUX cabinet system is a perfect match of made-in-Italy design and Cutting-edge technology and quality features, studied to enhance functionality, protection and versatility of your enclosure solutions.

BENEFITS

New constructive concepts	Sustainability
New high-strength low-alloy steel	Research and technology
Variety of solutions, configurations and dimensions	Flexibility
Rigid frame profile and sturdy structure	Strength
Innovative latch system	Functionality
Modern clean appearance and high aesthetics	Design
Perfect adherence to industry standards	Safety & reliability

e NUX

SUITE CABINET

FEATURES

- 1 Removable roof to simplify cable management.
- 2 Simple structure assembled with 8 screws only, thanks to the exclusive orthogonal joint manufactured from special steel.
- 3 Sturdy structural uprights manufactured from high-strength low-alloy steel with fiber laser welded closed symmetric profile.
- 4 Besides the E NUX version, a second configuration with simplified door and plate (E NUX simplex) is available for simpler applications.
- 5 New colour for top, plinth and handle (RAL 5020).
- 6 New colour (Pantone 2717U) for top, plinth and handle available as an option.
- 7 Locking system with a unique lever mechanism, unique design and:
 - 3-point locking for H=1400 and 1600
 - 4-point locking for H=1800 and 2000
 - 5-point locking for H=2200
 with possibility to mount different inserts and convenient lock release system of the slave door of the double door cabinet.

- 8 Reversible door with strengthening frame.
 - 9 Sturdy panels for high structural stiffness.
 - 10 Modular cable entry bottom with adjustable base plates and seal, consisting of one fiber laser-MIG hybrid welded piece with box-type construction manufactured from high-strength low-alloy steel.
 - 11 Front-inserted mounting plate, which can be recessed flush with the uprights thanks to the effective sliding guides system integrated in the bottom.
 - 12 Easy-to-assemble modular plinth EUZE
 - Possibility to adopt a fully modular Walk-On cable conduit.
 - Wide range of complementary accessories.
 - Wide range of sizes and unified structure for the configuration of automation cabinets, modular solutions, PC enclosures, control desks, 19" rack solutions, and telecom/networking cabinets.
- Protection rating: IP55 - Nema 12 - IK10.

E NUX: SUSTAINABLE, STRONG AND PERFORMING CABINET

STRENGTH

Improved mechanical features and higher pulling, twisting, bending resistance thanks to fiber laser welded box-type uprights manufactured from high-strength low-alloy sheet steel and one-piece cable entry bottom, with box-type structure of press-bent fiber laser-MIG hybrid welded profiles of high-strength low-alloy sheet steel. Double cable entry with central partition crosspiece integrated in the bottom for increased sturdiness.

SAFETY

Modular cable entry bottom featuring adjustable base plates with metal fixing elements to guarantee automatic grounding: included in the standard supply, adhesive seal for an optimal cable routing to preserve the IP protection degree.

STURDINESS

The unique and innovative bending concept of back and side panels with rounded folding, ensures undisputed structural stiffness combined with the benefit of smoother handling and high aesthetics.

DESIGN

The E NUX cabinet is characterized by a unique feature: the selected finishing and the new colour impact represent the company's "sustainable" philosophy, while the innovative handle with a unique ergonomic design and soft shapes inspired to the drops of water combines functionality and harmony.

Concept of the handle: de Poorter design.

Handle selected for ADI Design Index 2013.

TECHNOLOGY

Lever-operated opening system with compact internal footprint, easy door release system for the slave door of the double door cabinet: with this opening concept, the operator no longer needs to put a hand into the cabinet and can use the same key as for the master door.

FLEXIBILITY

Over 90 standard dimensions, multiple configurations in mounted or flat-pack versions, selection between two different versions, full range of complementary accessories for multiple configurations. E NUX stands out for its wide range of solutions and multiple customization options.

EUPA front inserted mounting plate, see page 46

EUFU side panels, see page 57

EUZE modular plinth, see page 58

WTGS-001 eyebolts, see page 70

RAL 7035

RAL 5020

Pantone 2717U

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from high-strength low-alloy sheet steel, closed with continuous fiber laser welding and free of sharp edges. The bottom is a single piece with box-type structure manufactured from press-bent fiber laser-MIG hybrid welded profiles manufactured from high-strength low-alloy sheet steel. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

PAINT FINISH

ETA standard epoxy polyester powder coating.

- structure: RAL 7035 smooth finish
- door and rear panel: RAL 7035 textured finish
- roof: RAL 5020 textured finish.

ASSEMBLED E NUX CABINET

- structure manufactured from high-strength low-alloy sheet steel
- door manufactured from 2.0 mm thick sheet steel with stiffening frame, complete with $\varnothing$ 3 mm lever-operated double bar locking system
- rear panel manufactured from sheet steel with rounded folding
- removable roof manufactured from sheet steel
- bottom manufactured from high-strength low-alloy sheet steel with adjustable cable entry (double cable entry for W=1000), complete with seal supplied separately.

FLAT-PACK E NUX CABINET (ASSEMBLY WITH 8 SCREWS ONLY)

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: for further information, see the Technical section page 327.

Note: for W=400, only stiffening vertical profiles.

RAL 7035

RAL 5020

Pantone 2717U

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from high-strength low-alloy sheet steel, closed with continuous fiber laser welding and free of sharp edges. The bottom is a single piece with box-type structure manufactured from press-bent fiber laser-MIG hybrid welded profiles of high-strength low-alloy sheet steel and an integrated central partition crosspiece. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

PAINT FINISH

ETA standard epoxy polyester powder coating.

- structure: RAL 7035 smooth finish
- doors and rear panel: RAL 7035 textured finish
- roof: RAL 5020 textured finish.

ASSEMBLED E NUX CABINET

- structure manufactured from high-strength low-alloy sheet steel
- door manufactured from 2.0 mm thick sheet steel with stiffening frame, complete with $\varnothing$ 3 mm lever-operated double bar locking system
- rear panel manufactured from sheet steel with rounded folding
- removable roof manufactured from sheet steel
- bottom manufactured from high-strength low-alloy sheet steel with adjustable double cable entry, complete with seal supplied separately.

FLAT-PACK E NUX CABINET (ASSEMBLY WITH 8 SCREWS ONLY)

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: for further information, see the Technical section page 327.

* With side panels mounted, add 12 mm

To be used as an end or intermediate element in a suite of cabinets. Front and/or rear access.

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from high-strength low-alloy sheet steel, closed with continuous fiber laser welding and free of sharp edges. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

PAINT FINISH

ETA standard epoxy polyester powder coating.

- structure: RAL 7035 smooth finish
- doors and rear panel: RAL 7035 textured finish
- roof: RAL 5020 textured finish.

ASSEMBLED E NUX MODULE

- structure manufactured from high-strength low-alloy sheet steel
- door manufactured from sheet steel with stiffening frame, complete with ø 3mm lever-operated double bar locking system
- rear panel manufactured from sheet steel with rounded folding
- removable roof manufactured from sheet steel
- bottom manufactured from sheet steel.

FLAT-PACK E NUX MODULE (ASSEMBLY WITH 8 SCREWS ONLY)

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: codes are referring to the version with roof and handle in RAL 5020. Available on demand in version Pantone 2717U; to order you have to add the suffix "A" to the code of the assembled cabinet (i.e.: ENUX031604A) or cabinet kit for roof + bottom and door (i.e.: EUTF030040A, EUP0030160LA).

Note: for further information, see the Technical section page 327.

* With side panels mounted, add 12 mm

CABLE ENTRY MODULE SIDE OPENING EURP

To be positioned at the end of a cabinet suite for protecting cable and connector systems. Lateral access.

CHARACTERISTICS/SUPPLY

- structure manufactured from 1.5 mm thick press bent and welded sheet steel
- door manufactured from 2.0 mm thick sheet steel with 110° door opening
- sealing gasket.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

PROTECTION RATING

IP55.

FRONT INSERTED MOUNTING PLATE EUPA

Manufactured from sendzimir sheet steel:

- thickness 2.5 mm for $W < 1000$ and $W = 1600$
- thickness 3.0 mm for $W \geq 1000$.

Note: mounting plate $W > 1400$ mm manufactured in two parts with horizontal union and stiffening omega-rings.

Note: to be ordered separately: WTKB-002 mounting accessories for mounting plate.

SIDE INSERTED MOUNTING PLATE EUPL

CHARACTERISTICS

Manufactured thick sendzimir sheet steel.

SUPPLY

Includes 1 piece with sliding guides and mounting accessories.

Note: mounting plate $L \geq 1400$ mm and $L = 1600$ mm manufactured in two parts with vertical union and stiffening omega-rings. Max $L = 3$ m.

** Calculated without stiffening omega-rings

PARTIAL MOUNTING PLATES

Partial mounting plate manufactured from sendzimir sheet steel. Designed to allow an easy mounting in different positions (i.e. C, D, E) by using a universal mounting kit and optimizing the empty space between two plates in order to guarantee continuity in cable wiring.

Suite

SUPPORTING BRACKETS WTSC-001

Central support brackets for mounting plates.

SUPPLY

Includes 2 pieces with mounting accessories.

Note: fixing rails H=50 (see page 68) to be ordered separately.

Note: available on request.

INTERMEDIATE MOUNTING PLATE EUPN

To give continuity to mounting plates between two cabinets mounted in a suite.

CHARACTERISTICS

Manufactured from 2.5 mm thick press bent sendzimir sheet steel.

SUPPLY

Includes 1 piece with mounting accessories.

PLEXI DOOR EUPV

CHARACTERISTICS

Manufactured from 2.0 mm thick sheet steel with viewing window, tubular stiffening frame and 4.0 mm thick clear Plexiglas.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- two upright rails complete with accessories
- door complete with sealing gasket, tubular stiffening frame and $\varnothing$ 3mm lever-operated double bar locking system.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- impact resistance IK10 complying with IEC EN62208; EN62262.

- Assembled version: see page 34, 35, 36 to choose the part numbers E NUX...PV
- Flat-pack version: see above to choose the part numbers of the plexi door EUPV (provided with front uprights) and see page 34, 35, 36 to complete the cabinet with EUTF (top + bottom) and EURE (rear panel + rear uprights).

Note: glazed door available on request.

Note: codes are referring to the version with handle in RAL 5020. Available on demand in version Pantone 2717U; to order you have to add the suffix "A" to the code (i.e.: EUPV060140A).

SPLIT VERTICAL DOORS EUPO

CHARACTERISTICS

Door manufactured from 2.0 mm thick press bent sheet steel material.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- door W=800 with split vertical doors 400+400 (H=1800 and 2000)
- available on request doors with different dimensions (i.e. W=1200 with split doors 800+400/ W=1000 with split doors 800+200).

PROTECTION RATING

- IP55 complying with EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- impact resistance IK10 complying with EN62208; EN62262.

Note: available on request.

Note: available on request split vertical doors with door stop for Dis-connector (see page 71).

Suite

DOOR STOP WTFP-001

Allows the mechanical stop of the door at 90°, preventing the accidental closing.
This equipment is compatible with the 180° rack structure mounted in the most forward position and the E NUX plexi/glazed doors too.

CHARACTERISTICS

Manufactured from 2.5 mm thick zincpassivated sheet steel.

SUPPLY

Includes 1 piece with accessories.

Note: available on request the item for allowing the mechanical stop of the door at 135°. (Code WTFP-002)

INNER DOOR EUPI

CHARACTERISTICS

Manufactured from 2.0 mm thick sheet steel supplied complete with vertical uprights and horizontal rails.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- door complete with $\varnothing$ 3 mm double bar locking system and hinges
- vertical uprights and horizontal rails
- mounting accessories.

LATERAL DOOR EUPF

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- door complete with sealing gasket, $\varnothing$ 3mm lever operated double bar locking system
- 4 hinges
- mounting accessories.

Note: codes are referring to the version with roof and handle in RAL 5020. Available on demand in version Pantone 2717U; to order you have to add the suffix "A" to the code of (i.e.: EUPF040140A).

SIDE PANELS EUFI

CHARACTERISTICS

Manufactured from press-bent sheet steel with rounded folding.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- two side panels
- rapid fastening couplers
- mounting accessories.

Note: to order a pair of side panels for mounting on hinge side 180°, you have to add the suffix "C" to the code (i.e.: EUFI040140C).

MODULAR PLINTH EUZE

CHARACTERISTICS

Corner pieces manufactured from 2.5 mm thick press bent sheet steel, with PVC front covers caps. Front and side crosspieces manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

The modular plinth is made up of:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- front crosspieces: supply includes 2 pieces
- side crosspieces: supply includes 2 pieces.

Note: to order the front and side crosspieces H=200, add the suffix "D" to the code (i.e.: EUZE-T0300D).

Note: supply includes 2 pieces.

Note: codes are referring to the version in RAL 5020. Available on demand in version Pantone 2717U; to order you have to add the suffix "A" to the code (i.e.: EUZE-A100A, EUZE-T0300A, EUZE-T0300DA).

WATERTIGHT PLINTH H=200 MM EUZ3

To be used as a conduit for cables passage and to protect cables from chemical agents and accidental shocks.

CHARACTERISTICS

Manufactured from 2.0 mm thick press bent and welded sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

- plinth (without covers)
- adhesive gasket
- mounting accessories.

Note: two side covers to be ordered separately.

Note: the codes are related to the RAL 5020 version. Available on demand in Pantone 2717U version; to order you have to add the suffix "A" to the code (i.e.: EUZ3-040040A).

LIFTING DEVICE FOR JOINED CABINETS TR-01

CHARACTERISTICS

"L" shaped profile hot-rolled 80 x 60 mm.

PAINT FINISH

Colour: RAL 5020 textured finish.

Note: available on request.

TRANSPORTATION PLINTH EUZU

Available in 2 versions:

- 1 Manufactured from 3.0 mm thick press bent sheet steel, 100mm high
- 2 "U" shaped hot-rolled profile, 100 mm high.

PAINT FINISH

Colour: RAL 5020 textured finish.

Note: available on request.

ANTI VIBRATION PLINTH EUZV

Manufactured from 3.0 mm thick press bent sheet steel, H=100mm, with special anti vibration devices.

PAINT FINISH

Colour: RAL 5020 textured finish.

Note: available on request.

The seismic design study starts from the vulnerability evaluation of the structure located in different geographical scales. Thanks to the activity developed together with the Foundation Eucentre Pavia, TREES Lab (Laboratory for Training and Research in Earthquake Engineering and Seismology), we have set the following research activities:

- 1 Modelling and numerical simulation of the seismic response of two cabinets, in order to study, during the design phase, the behaviour that the systems considered (E NUX with anti-vibration plinth and E NUX with anti-seismic kit) would have manifested towards seismic actions in various geographical areas and on different soils.
- 2 Seismic simulation of the two cabinets dynamic behaviour on a vibrating table, with experimental tests on structures in order to realize experimental research on prototypes, also in large-scale (both static and dynamic tests).

Note: for more information, see the Technical section on page 327.

BASIC VERSION

TECHNICAL DATA

Peak acceleration $\leq 1G$.

Mounting plate loaded up to 130 Kgs.

CHARACTERISTICS

- Plinth manufactured from press bent sheet steel, thickness 3.0 mm $H=100$, with anti-vibration elements and the possibility of floor fixing. Painting colour: RAL 5020 textured finish.
- Rails WTPR (2 pieces) mounted in depth for the central fixing of the mounting plate + WTSF-001.

MEDIUM VERSION

TECHNICAL DATA

Peak acceleration $\leq 1G$.

Loaded mounting plate $> 130 \leq 450$ Kgs.

CHARACTERISTICS

- Plinth manufactured from press bent sheet steel, thickness 3.0 mm $H=100$, with anti-vibration elements and the possibility of floor fixing. Painting colour: RAL 5020 textured finish.
- Rails WTPR (2 pieces) mounted in depth for the central fixing of the mounting plate + WTSF-001.
- 2 top and bottom fixing brackets for mounting plate, manufactured of galvanized steel, thickness 3.0 mm.

- Rails WTPR (2 pieces) mounted in depth for the central fixing of the mounting plate + WTSF-001.
- 2 top and bottom fixing brackets for mounting plate, manufactured of galvanized steel, thickness 3.0 mm.
- 4 stiffening frames manufactured from galvanized steel, thickness 2.0 mm.
- 8 stiffening structure brackets manufactured from galvanized steel, thickness 3.0 mm.

Suite

SPECIAL SOLUTIONS FOR E NUX CABINETS WITH IP > 55 OR NEMA 4 / NEMA 4X

For IP protection rating or NEMA that are different from the standard (E NUX IP55 / NEMA 12), special cabinets supplied already mounted are available.

Material: mild steel or stainless steel AISI304L / AISI316L

Application: indoor or outdoor

Version: single blank door cabinet in stand-alone version or joined in a suite.

SPECIAL CABINET IP>55

Material: mild steel and stainless steel AISI304L or AISI316L

Application: indoor or outdoor

CHARACTERISTICS

E NUX cabinet supplied already mounted, with panels provided with silicone seal, specific kit of screws and components, unique base plate for cable entry bottom. Mandatory rain canopy for outdoor applications, supplied not assembled on the cabinet.

PAINT FINISH

ETA standard epoxy polyester powder coating. Colour: RAL 7035 textured finish.

For outdoor applications: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (colour RAL7035 smooth).

SPECIAL CABINET NEMA 4

Material: mild steel

Application: indoor or outdoor

CHARACTERISTICS

E NUX cabinet supplied already mounted, with panels provided with silicone seal, specific kit of screws and components, unique base plate for cable entry bottom. Mandatory rain canopy for outdoor applications, supplied not assembled on the cabinet.

PAINT FINISH

ETA standard epoxy polyester powder coating. Colour: RAL 7035 textured finish.

For outdoor applications: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (colour RAL7035 smooth).

SPECIAL CABINET NEMA 4X

Material: stainless steel AISI304L or AISI316L

Application: indoor or outdoor

CHARACTERISTICS

E NUX cabinet supplied already mounted, with panels provided with silicone seal, specific kit of screws and components, unique base plate for cable entry bottom. Mandatory rain canopy for outdoor applications, supplied not assembled on the cabinet.

Note: for particularly harsh outdoor applications, we recommend the use of stainless steel solutions. For further information, see the Technical section or ask for our E BOOK.

RAIN CANOPY EUTT

Particularly suitable for outdoor applications, where it is required an additional protection from atmospheric agents. We recommend the use of a cycle of special polyester painting for outdoor.

CHARACTERISTICS

Manufactured from 1.5 mm sheet steel. Available for single cabinets or cabinets joined in a suite.
H = 40 mm.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

Includes 1 piece complete with mounting accessories.

Note: rain canopy with different inclinations and angles are available on request.

Note: different dimensions available on request.

Suite

**CASTORS WTRU-001**

High quality polyamide wheels. Load capacity 120 kgs each wheel.

SUPPLY

Includes 4 pieces (2 rotating wheels, 2 wheels with brake).

**LEVELLING FEET WTPX-001**

They can be applied on the cabinet structure or plinth. Suitable for un-even floors or applications that require cleaning under the cabinet.

CHARACTERISTICS

In PVC, screws made from zinc steel.

SUPPLY

Includes 4 pieces with plate and mounting accessories.

Note: for suite cabinets, order levelling feet WTPX-002.

ONE PIECE CABLE ENTRY BOX FOR JOINED CABINETS**CHARACTERISTICS**

Manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

Colour: RAL 7035 textured finish.

SUPPLY

Includes 1 piece cable entry box with lifting devices.

Note: available in one piece up to 1800 mm wide.

Note: available on request.

CABLE ENTRY BOX EUVC

For mounting on cabinet roof, it offers complete accessibility from each side and allows cabling or bus-bar systems to be installed.

CHARACTERISTICS

Structure manufactured from 1.2 mm thick sheet steel, complete with fixing and lifting joints.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- Includes:
- cable entry box with rear and front panel
 - adhesive gasket.

PROTECTION RATING

IP55.

Note: to be ordered separately:

1. side covers
2. use cabinet roof to close top of cable entry box
3. dividing panel between cable entry box and cabinet is available on request (manufactured from 1.5 mm thick sendzimir sheet steel including gasket).

REINFORCING BRACKETS EUKU-003

To be used to provide more rigidity to cabinets joined in a suite.

CHARACTERISTICS

Manufactured from 4.0 mm thick zincpassivated sheet steel.

SUPPLY

Includes 4 pieces with mounting accessories.

UNIVERSAL JOINING KIT EUKU-008

Fast-fixing joining kit, designed to easily join E NUX cabinets. The item combines the strenght of the solution to the flexibility of its application and assembly.

CHARACTERISTICS

Manufactured from zinc-passivated sheet steel.

SUPPLY

Includes nr. 8 pieces with mounting accessories.

JOINING KIT EUKU-001/EUKU-002

To be used to join two cabinets together. It's recommended to use lifting brackets WTSS-001 instead of lifting eyebolts.

CHARACTERISTICS

Union spacers and mounting accessories manufactured from zinc sheet steel with adhesive gasket to guarantee IP protection degree.

SUPPLY

Includes union spacers and fixing accessories.
EUKU-001 includes 4 pieces for cabinet H=1400
EUKU-002 includes 8 pieces for cabinet H=1600/1800/2000/2200.

JOINING KIT EUKU-005/EUKU-006

CHARACTERISTICS

Simplified solution of joining kit manufactured from 4.0 mm thick pressed zincpassivated sheet steel.

SUPPLY

EUKU-005 includes 4 pieces for cabinet H=1400
EUKU-006 includes 8 pieces for cabinet H=1600/1800/2000/2200.

Note: E NUX suite cabinets are provided with CE, ATEX, TUV, RINA, cULus, EAC, ROHS marks, with protection rating IP55, NEMA 12, IK10.

Zincpassivated self-tapping screws Ø 5.5x13.

SUPPLY

Includes 50 pieces.

EYEBOLTS WTGS-001

CHARACTERISTICS

Zincpassivated M12 lifting eyebolts.

SUPPLY

Includes 4 pieces.

LIFTING BRACKETS WTSS-001

CHARACTERISTICS

Lifting brackets manufactured from 5.0 mm thick zincpassivated sheet steel.

SUPPLY

Includes 4 pieces.

Note: if 2 lifting brackets only are needed, order WTSS-001CP.

180° DOOR HINGES EUCE

Hinges for 180° opening to be mounted on standard doors, complete with mounting accessories.

CHARACTERISTICS

Manufactured from pressed zama.

PAINT FINISH

Colour: RAL 5020 smooth finish.

SUPPLY

EUCE-180001 supply includes 4 pieces

EUCE-180002 supply includes 5 pieces

EUCE-180003 supply includes 3 pieces.

Note: to be ordered separately side panels EUFI-C for the assembly on the side provided with 180° hinges, see page 57.

Note: codes are referring to the version in RAL 5020. Available on demand in version Pantone 2717U; to order you have to add the suffix "A" to the code (i.e.: EUCE-180001A).

180° HINGES	
EUCE CODE	DOOR HEIGHT
EUCE-180001	1800 - 2000
EUCE-180002	2200
EUCE-180003	1400 - 1600

DOOR LOCK FOR CABINETS JOINED IN A SUITE WTBP

It can be used on E NUX enclosures joined in a suite, as a complement to the door lock of the standard main switches. The secondary doors in line are opened only after the main door/s has opened. The position of the main switch of flat-pack enclosures is not binding, as it is independent of the door recess. The opening/closing of secondary doors occurs simultaneously, following the locking/unlocking of the door with the main switch.

CHARACTERISTICS

Door lock parts manufactured from 2.5 mm thick galvanized sheet steel. Connection blocks and transmission rods manufactured from galvanized sheet steel.

1 WTBP-001

Control device for enclosure with main switch (main panel). Consider one piece per battery.

2 WTBPB-001

Door lock for cabinets joined in a suite (to be installed on secondary cabinets). Consider one piece for each single door and master door of the double door cabinet.

4 WTBP-060 W=600

WTBPA-080 W=800

WTBPA-120 W=1200

WTBPA-140 W=1400

WTBPA-160W=1600

Transmission rods (1 piece) to transfer the lock status from the main to the secondary enclosures. For each secondary enclosure, one rod of the same size as the enclosure is required.

3 + 5 WTBP-001

Rod joining blocks (5 pcs) and intermediate supports (5 pcs).

6 WTBP-001

Door block support for final enclosure. Consider one piece per battery.

8 WTBPB-002 (Suggested)

Safety kit for complete door closing of secondary cabinets in case of closing the main cabinet door. Consider one piece for each WTBPB-001.

DISCONNECTING SWITCH WTBP-001 (US VERSION)

Regulations for the US market prescribe a safety lock for a single enclosure or a set of flat-pack enclosures. The disconnecting switch can be installed only with the following models of main switches:

- 1494 V-H1 (operating lever) - Allen Bradley
- 9422 A1 - Square D
- Max Flex Series/ FHOH - ITE Siemens
- Type 1 and 2 – General Electric TDA.

7 WTBP-001

Safety lock for main door (for US). Consider one piece per cabinet.

For complete installation, a system with door lock for main enclosure, locks for secondary doors and transmission rods of the same width as the enclosure is required.

CHARACTERISTICS

Door lock parts manufactured from 2.5 mm thick galvanized sheet steel.

DOOR INTERLOCK WTBP-001

This mechanical door interlock allows the opening of the second door only when the main one is open.

CHARACTERISTICS

Manufactured from 2.0 mm thick zincpassivated sheet steel.

SUPPLY

Includes 1 piece supplied with mounting accessories.

BLANK VERTICAL DIVIDING PANEL EUD1

Manufactured from 1.5 mm thick sendzimir sheet steel then folded on the sides. To be used to separate two cabinets.

SUPPLY

Includes 1 piece complete with mounting accessories.

PUNCHED PARTITION PANEL EUD2

Punched partition panel for 24 pole connectors, manufactured from 1.5 mm thick sendzimir sheet steel.

SUPPLY

Includes 1 piece complete with mounting accessories.

WE350Z

Closing plate (supply includes 1 piece).

WE351Z

Reducer 24/16 poles (supply includes 1 piece).

WE352

Gasket (supply includes 1 piece).

FRAME JOINING KIT BACK TO BACK EUTP

CHARACTERISTICS

Special kit to join cabinets back to back, manufactured from 1.5 mm thick press bent sheet steel.

PAINT FINISH

Colour: RAL 7035 textured finish.

SUPPLY

- joining frame
- trim covers with gasket and mounting accessories.

FRAME JOINING KIT BACK TO BACK

CORNER CABINET

CHARACTERISTICS

Manufactured from 1.5 mm thick press bent sheet steel.

PAINT FINISH

Colour: RAL 7035 textured finish.

SUPPLY

- joining frame
- removable front trim panel
- side trim panels
- gasket and mounting accessories.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: available on request.

UNIVERSAL WORK SHELF EURL001

Ideal for positioning programming equipment, or as a simple support shelf, this unit can be folded down thanks to its special system of guides. Furnished in a single size (W = 420mm and D = 400mm), the shelf can be adjusted to three positions (50° / 70° / 90°), and can be mounted directly onto the reinforcing frame of the solid doors E NUX W = 600. For W> 600, order the universal shelf EURL001 with a pair of WTTO door crossbars. Maximum load carrying capacity: 20kg.

STRUCTURE

Made from sheet steel with a thickness of 1.5 mm.

COATING

Thermosetting epoxy polyester powder coating, ETA standard cycle.
Colour: RAL 7035 textured finish.

COMPOSITION

Single piece complete with supporting rods and mounting accessories.

NOTE: See the following page for the WTTO crossbars.

EXTERNAL SHELF WTRE000600

Equipped with guides and a double flap closing system, this unit can be mounted on the exterior side of the ETA cabinets' solid doors (door customization must be requested at the time of the order).

STRUCTURE

Made from sheet steel with a thickness of 1.5mm.

COATING

Thermosetting epoxy polyester powder coating, ETA standard cycle.
Colour: RAL 7035 textured finish.

COMPOSITION

Single piece complete with guides and mounting accessories.

PLAN POCKET WTTS

CHARACTERISTICS

Large size plan pocket manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

Colour: RAL 7035.

SUPPLY

Includes 1 piece complete with mounting screws

WTTS001000	1000

PLAN POCKET WA050

A4 sheet size plan pocket manufactured from thermo-plastic material.

SUPPLY

Includes 1 piece with double sided adhesive tape.

ALUMINIUM WINDOW WIPX

To be used to protect components mounted on the door. Manufactured from anodized aluminium with glazed panel and sealing gasket.

SUPPLY

Includes 1 piece.

ALUMINIUM WINDOW

WIPX CODE	A	B
WIPX-44	400	400

WTTO-001000	1000	884

CABLE HOLDING BAR WTSU-001

C-shaped drilled bar with 30x15 mm dimensions, to be mounted horizontally for anchoring and structured cabling.

CHARACTERISTICS

Manufactured from 2.0 mm thick sheet steel.

SUPPLY

Includes one piece (L=2000 mm). Exact length to be specified when ordering.

Note: supporting brackets WTSQ-001 for width < 800 or WTSQ-005 for width ≥ 1000 to be ordered separately.

SUPPORTING BRACKETS WTSQ-001

Required to fasten the WTSU cable holding bar to the back panel. Fully compatible with 25 mm pitch drilling, they can be used as universal supporting brackets.

CHARACTERISTICS

Manufactured from die-cast zinc alloy.

SUPPLY

Package with 2 pieces complete with screws (see A).

Note: for cabinet width ≥ 1000, order code WTSQ-005 (including 3 brackets and a compensation shim - see B).

Fig. A

Fig. B

CABLE CLAMPING BRACKET WTSM

To be applied onto WTSU cable holding bar.

MODULAR BASE PLATE FOR
CABLE ENTRY WTTG

CHARACTERISTICS

Modular elements manufactured from 1.0 mm thick sheet steel to customise the cable entry according to the final application. For dimensions, see pages 31, 32 and 39 – columns E / F.

SUPPLY

Includes 1 piece complete with gasket for W≤800mm.
Includes 2 pieces complete with gasket for W≥1000mm.

* Cabinets with double cable entry

TRANSFORMER SUPPORT WTST

Manufactured from 2.5 mm thick press bent sendzimir sheet steel allowing the sliding of special nuts. The two rails and the nuts are adjustable, thus allowing easy fixing and positioning of transformers.

SUPPLY

Includes 2 rails with mounting accessories.

TRANSFORMER SUPPORT

WA385

Special sliding nuts to fix transformer. Supply includes 4 nuts, screws and washers.

MARKER WI7035

Easy to use, it is used for minor adjustment on painted surfaces.
Colour: RAL 7035

VDE OUTLET WTVD-001

For application on DIN profile.
Dimensions: W x H x D = 52 x 52 x 59.

MICROSWITCH WI100

Complying with IEC 337-VDE 0660.
Fast-installed thermoplastic support.

SUPPLY

Includes microswitch with support and mounting accessories.

CONFORMITY AND APPROVAL

CABINET MOUNTING KIT EUKM-001

Dynamometric key.

THREE-PHASE FLASHING SAFETY DEVICE WI105

The device indicates the power status of the distribution board and shows it visually by means of three high-yield LEDs. It is connected directly after the main switch and positioned so that it is clearly visible when the door is opened. Flashing indicates dangerous voltage. The electronic circuit based on SMD technology is optimized for multiple voltage RATING (110÷690V) both for single-phase and three-phase circuits. The safety device WI105 is also provided with electrically separated protection terminals to insulate the parts under voltage, suitable for large section wires (2.5 mm²) and with screw terminals up to 5mm diameter.

SUPPLY

- metal fixing bracket
- flashing device
- interlocking limit switch with NC contact for auxiliary circuits.

CONFORMITY AND APPROVAL

Compliant with IEC 947-5-1 CEI 7.45 EN60947.5.1.

PROTECTION CLASS

II.

Note: upon request, a N.O. contact WI107 can be supplied separately.

CABINET MOUNTING KIT EUKM-004

Kit of 2 Allen wrenches (1 for dynamometric key and 1 for electric screwdriver).

Note: available on request:

- electric screwdriver with battery charger (EUKM-002)
- professional electric drill with battery charger (EUKM-003).

LAMP WTLA-080

New long-lasting and energy-saving LED lamp, that can be fixed with brackets or magnetic support. Up to 10 lamps can be mounted.
Power: 5W
Life cycle: 60.000h at +20°
Connection: 2-pole connector with snap lock
AC: max. 2,5 A / 240 V AC, colour: white
DC: max. 2,5 A / 60 V DC, colour: blue

PROTECTION RATING:
IP20 / II

FLUORESCENT ELECTRONIC LAMP

A complete lighting system for industrial cabinets, featured by a compact shape and eye-catching design. The lamp can be easily fastened on the cabinet and allows an orientation of 180°; up to 5 lamps can be mounted in a single cabinet.

CHARACTERISTICS

Casing in aluminium finishing, diffuser in methacrylate with switch.

SUPPLY

Includes 1 piece supplied with adjustable fixing brackets, mounting accessories and a bipolar connector for the wiring.

Available on request: magnetic mounting kit, male double pole connector for sequential lamps wiring, system positioning limit switch.

FLUORESCENT ELECTRONIC LAMP

WTLA-090 *	WTLA-100	13	600	560
	WTLA-105	21	900	860

* INTERTEK - ETL approval for USA and Canada

FLUORESCENT LAMP WTLA-030/WTLA-035

Fluorescent lamp 11W, 230V nominal voltage, with SCHUKO style power suitable for all the cabinets and panels:

- the installation support is included and further devices can be used
- the lamp can be mounted with screws on narrow or large areas and it can be fixed to DIN profiles of 35 mm
- available on request without plug (WTLA-035).

Note fixing support WTSL-002 to be ordered separately.

LAMP SUPPORT WTSL-002

Manufactured from 1.5 mm thick sendzimir sheet steel

MAGNETIC PLATE WTPM-001

Used in alternative when the space available for fixing the lamp is reduced.

POWER CONNECTOR WTCA-001

Power connector for lamp joined in sequence.

SUPPLY

Includes 1 piece with mounting accessories..

Suite

The ETA suite cabinet system with ETA tested busbar system and supports is complying with 61439-1-2:

1. Short circuit resistance testing performed at the ABB Sace laboratory of Bergamo (Italy). Relative certification nr. 175 issued by ACAE of Bergamo (Italy) based on the LOVAG reports issued by ABB Sace.
2. Verification of Temperature-rise limits carried out at the I.N.R.I.M. laboratory of Turin (Italy) with test report nr. 14-0114-01.
3. Short circuit testing affected by the switches, with I_{cc} 100kA/1s, performed at the ABB Sace laboratory of Bergamo (Italy). Relative certification nr. 477 issued by ACAE of Bergamo (Italy) based on the LOVAG reports issued by ABB Sace.

TECHNICAL FEATURES

Rated frequency	50Hz
Rated voltage U_e	400V ~ o 690V~
Rated insulated voltage U_i	1000V

EXAMPLE

Cabinet dimensions 800 x 2000 x 600 (W x H x D) with blank front door and screwed rear panel, complete with mounting plate, side panels and plinth.

Suite

CODE		STRUCTURE	
ENUX	0 8 2 0 0 6 P R	1	Indicative code
1	2 3 4 5	2	It shows the width of the cabinet
		3	It shows the height of the cabinet
		4	It shows the depth of the cabinet
		5	Suffix that shows the cabinet composition

PR stands for the cabinet structure with front door and screwed rear panel.

If a front glazed door is required, it is necessary to change the suffix PR with PV (ENUX082006PV). If blank doors are required in the front and in the rear, the suffix changes to DP (ENUX082006DP).

Single packaging.

CODE		FRONT INSERTED MOUNTING PLATE	
EUPA -	0 8 0 2 0 0	1	Indicative code
1	2 3	2	It shows the cabinet width
		3	It shows the cabinet height

It shows a front inserted mounting plate.

If a side inserted mounting plate is required, the code is EUPL-080200.

Single packaging.

WTKB - 002

Mounting accessories for EUPA mounting plate (to be ordered separately).

CODE		SIDE PANELS (2 PIECES)	
EUFI	0 6 0 2 0 0	1	Indicative code
1	2 3	2	It shows the depth of the cabinet
		3	It shows the height of the cabinet

It shows two side panels complete with mounting accessories.

Single packaging.

CODE		UNIVERSAL PLINTH EUZE	
EUZE -	A 1 0 0	1	Indicative code
1	2	2	It shows the height of the plinth
EUZE -	T 0 8 0 0	1	Indicative code
1	2	2	It shows the cabinet/plinth width
EUZE -	T 0 6 0 0	1	Indicative code
1	2	2	It shows the cabinet/plinth depth

It shows the complete plinth H=100 mm, consisting in 3 different packages.

It shows the corner pieces of the plinth H=100, complete with front covers and mounting accessories (supply includes 4 pieces).

It shows the front crosspieces W=800 (supply includes 2 pieces).

It shows the side crosspieces D=600 (supply includes 2 pieces).

If a 200 mm high plinth is required, the code of the corner plinth is EUZE-A200, for the front and side crosspieces H=200, please add D to the code (EUZE-T0800D and EUZE-T0600D).

Monobloc

ETA QUALITY, PROMPTLY

ETA introduces E MOX, the range of monobloc enclosure solutions proposed as the effective combination of strength and modularity.

E MOX - offered with a particular front and rear aesthetic profile to comply with E NUX style - is built up with a unique symmetric monobloc structure with top, bottom and side panels welded, and front door provided with an innovative lever-operated latch system.

E MOX is completely compatible with E NUX standard range of accessories: it can be completely customized thanks to the assembly of specific vertical uprights, which allow creating the same inner spaces of E NUX modular cabinet system.

The product philosophy that led the design of E MOX is based on the concepts of time and space, in order to provide the end user with the maximum advantage in terms of optimization and saving.

Time: because E MOX is a unique cabinet completely welded, with mounting plate included in the supply and available in 27 standard dimensions. Time: because E MOX is totally compatible with E NUX cabinets in terms of standard components (doors, rear panels, base plates, mounting plate) and inner accessories (profiles, brackets, partial mounting plates, etc).

Time: because E MOX is a monobloc shell with modular options.

BENEFITS

Aesthetic profile and new colour	Design
Symmetric monobloc structure	Strength
Possibility of creating inner E NUX structure	Modularity
Standard E NUX accessories	Compatibility
Innovative latch system	Functionality
Perfect adherence to industry standards	Safety

e mox

MONOBLOC CABINETS

FEATURES

- 1 Unique symmetric monobloc structure with top, bottom and side panels welded.
- 2 Front and rear aesthetic profiles to comply with E NUX style.
- 3 Removable rear panel and possibility to assemble rear door (E NUX door and rear panel).
- 4 Lifting with 2 eyebolts.
- 5 Front inserted mounting plate (EUPA) included in the supply.
- 6 Innovative opening system with a unique lever mechanism, unique design and:
3-point locking for H=1600
4-point locking for H=1800/2000
with possibility to mount different inserts.

- 7 Effective sliding guides system integrated in the bottom.
- 8 Modular cable entry bottom with adjustable base plates and gasket.
- 9 Reversible door with stiffening frame.
- 10 Vertical uprights available as accessories to create the same inner structure of E NUX cabinet.
- 11 Wide range of standard accessories of E NUX system (door, rear panel, mounting plate, complementary accessories).
- 12 Differentiated colour impact: RAL7035 for the cabinet and new colour RAL5020 matched with aesthetic profiles, handle and plinth.
- 13 Easy-to-assemble modular plinth EUZE.

Protection rating: IP66 (single door), IP55 (double door)
- Nema 12 - IK10.

CHARACTERISTICS

Enclosure manufactured from 1.5 mm thick sheet steel with removable rear panel. Door manufactured from 2.0 mm thick sheet steel with stiffening frame.

PAINT FINISH

ETA standard epoxy polyester powder coating

Structure and door: RAL 7035 textured finish.

Aesthetic profiles: RAL 5020 textured finish.

Monobloc

SUPPLY

- structure complete with aesthetic profiles and rear panel.
- 2.0 mm thick sheet steel door, with stiffening frame and complete with $\varnothing 3$ mm lever-operated double bar locking system
- adjustable cable entry
- mounting plate manufactured from 2.5 mm thick sendzimir sheet steel (for E MOX W=1000, EUPA 3.0 mm thick).

PROTECTION RATING

- IP66 complying with IEC EN62208; EN60529
- NEMA 12 complying with UL508A; UL50*
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208, EN62262.

*NEMA 4 available on request.

Note: in case it is necessary to replace the mounting plate EUPA, you have to use the codes on page 46.

EUPA-180100	1800	1009	395	1685	880	350

Note: mounting plate EUPA for E MOX horizontal version is supplied in one piece.

Monobloc

MODULAR PLINTH EUZE

CHARACTERISTICS

Corner pieces manufactured from 2.5 mm thick press bent sheet steel, with PVC front covers caps.
Front and side crosspieces manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

The modular plinth is made up of:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- front crosspieces: supply includes 2 pieces
- side crosspieces: supply includes 2 pieces.

UNIVERSAL CORNER PIECES

EUZE CODE	DESCRIPTION
EUZE-A100	CORNER PIECES FOR PLINTH H=100
EUZE-A200	CORNER PIECES FOR PLINTH H=200

Note supply includes 4 pieces with mounting accessories.

FRONT CROSSPIECES

EUZE CODE	DESCRIPTION	CROSS. LENGTH MM
EUZE-T0600	PLINTH FRONT CROSSPIECES W=600	444
EUZE-T0800	PLINTH FRONT CROSSPIECES W=800	644
EUZE-T1000	PLINTH FRONT CROSSPIECES W=1000	844
EUZE-T1200	PLINTH FRONT CROSSPIECES W=1200	1044
EUZE-T1400	PLINTH FRONT CROSSPIECES W=1400	1244
EUZE-T1600	PLINTH FRONT CROSSPIECES W=1600	1444
EUZE-T1800	PLINTH FRONT CROSSPIECES W=1800	1644

Note: supply includes 2 pieces.

Note: to order the front crosspieces H=200, add the suffix "D" to the code. (i.e.: EUZE-T0600D).

E MOX SIDE CROSSPIECES

EUZE CODE	DESCRIPTION	CROSS. LENGTH MM
EUZE-T0400M	SIDE CROSSPIECES D=400	233
EUZE-T0500M	SIDE CROSSPIECES D=500	333

Note: supply includes 2 pieces.

Note: to order the side crosspieces H=200, add the suffix "D" to the code. (i.e.: EUZE-T0400MD).

COMPATIBILITY WITH E NUX SYSTEM AND ETA ACCESSORIES:

- E NUX blank door, plexi door, rear panel
- mounting plate EUPA
- partial mounting plate EUPR, see page 51
- inner door EUPI, see page 56
- locking system WE, see page 53
- E NUX complementary accessories (i.e.: profiles H=50 mm WTPR and fast fixing brackets, door frame, drawing desk WTRL, plan pocket...) for inner mounting.

RAIN CANOPY EMTT

Ideal solution for outdoor installations where you need extra protection from atmospheric agents. We recommend the use of a special polyester painting for outdoor applications.

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

Includes 1 piece with mounting accessories.

Note: available on request rain canopy with different inclinations and angles.

INNER UPRIGHTS EUMI

Ideal solution to replicate the inside of the monobloc (E NUX) cabinet allowing the assembly of standard accessories including:

- partial mounting plates
- WTPR mounting rails
- 19" accessories
- shelves
- partial swing frames

CHARACTERISTICS

Manufactured from 1.5 thick sendzimir sheet steel.

SUPPLY

Includes 2 pieces with mounting accessories.

INNER UPRIGHTS	
EUMI CODE	CABINET HEIGHT
EUMI000800	800

DOOR STOP WTFP

It allows the mechanical stop of the door (90° or 135°), preventing the accidental closing.

Supply includes 1 piece with mounting accessories.

DOOR STOP	
WTFP CODE	OPENING
WTFP-006	90°
WTFP-007	135°

MICROSWITCH WI100M

Complying with standards IEC 337-VDE 0660.

SUPPLY

Includes microswitch, mounting bracket and screws.

CONFORMITY AND APPROVAL

Note: for assembly on E MOX cabinet provided with EUMI uprights, please order WI100.

180° DOOR HINGES
EUCE-180004

CHARACTERISTICS

Manufactured from pressed zama.

PAINT FINISH

Colour: RAL 5020 smooth finish.

SUPPLY

Includes 3 pieces.

WTGS-003

Zincpassivated M12 lifting eyebolts.

SUPPLY

Includes 2 pieces with nuts and washers.

Compact

ETA QUALITY, STURDY

E COMP represents the ideal solution to meet the need of a compact solution for both free-standing and wall-mounting applications.

The concept of E COMP make it available as the “link” between the E MOX monobloc cabinets and the ST wall-mounting boxes: E COMP has been designed for applications requiring a free-standing cabinet smaller than E MOX or a wall-mounting box larger than our ST.

E COMP is perfectly compatible with ETA solutions, thanks to the advanced design, the differentiated colour impact, the innovative latching system. E COMP - featured with solidity and ergonomic design - is provided with modular cable entry and fits with ETA standard accessories.

BENEFITS

Aesthetic profile and new colour	Design
Compact solution for free-standing or wall-mounting applications	Solidity
Functional and ergonomic compatibility with new ETA product philosophy	Integration
Innovative latch system	Functionality
Perfect adherence to industry standards	Safety

Compact

e comp

COMPACT ENCLOSURE

FEATURES

- 1 Visual uniformity with monobloc range E MOX and suite cabinets E NUX.
- 2 Completely welded enclosure.
- 3 Lifting with 2 eyebolts (same of E MOX cabinet) or wall-mounting with brackets (same of ST boxes).
- 4 3-points fixed locking system with the possibility of mounting different inserts.
- 5 Front inserted mounting plate included in the supply.
- 6 Door with reinforcement sendzimir profiles provided with a centre-to-centre distance that is identical to the one of the E NUX door, for the fixation of the same rail.

- 7 Possibility to assemble vertical/horizontal profiles and fast-fixing brackets.
- 8 Modular cable entry bottom with adjustable base plates and seal.
- 9 Easy installation of the mounting plate and effective sliding thanks to specific guides.
- 10 Differentiated colour impact: RAL 7035 for the cabinet and new colour RAL 5020 matched with aesthetic profile, handle and plinth.
- 11 Fitting with ETA range of accessories and easy-to-assemble modular plinth EUZE.

Protection rating: IP55 - Nema 12 - IK10.

Compact

CHARACTERISTICS

Enclosure manufactured from 1.5 mm thick sheet steel. Door manufactured from 2.0 mm thick sheet steel. Mounting plate manufactured from 2.5 mm thick sendzimir sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Enclosure and door: colour RAL 7035 textured finish.
Aesthetic profile: colour RAL 5020 textured finish.

SUPPLY

Enclosure supplied with:

- front aesthetic profile
- door with 2 stiffening sendzimir profiles and ø 3 mm double bar locking system
- adjustable cable entry
- front-inserted mounting plate.

PROTECTION RATING

- IP55 according to IEC EN62208; EN60529
- NEMA 12 according to UL508A; UL50*
- protection degree guaranteed by the two-component polyurethane foam
- impact resistance IK10 complying with IEC EN62208; EN62262.

*NEMA 4 available on request.

Modular

e nux

MODULAR SOLUTIONS

FEATURES

Thanks to the extreme flexibility of the cabinet system E NUX and to the compatibility with all ETA accessories, the structure of the cabinet allows the creation of modular solutions:

- modular enclosures for LV power distribution
- enclosures with external door modules and fully split cubicles
- enclosures with multiple doors with several separated cells on a single structure.

From structure to modular solution, in a few steps:

- 1 identification of the configuration based on E NUX cabinet
- 2 choice of the cabinet front, by simply selecting doors/panels
- 3 choice of the interior.

**CHARACTERISTICS/SUPPLY**

The solution is composed by:

- E NUX structure and bottom with adjustable cable entry manufactured from high-strength low-alloy sheet steel
- roof manufactured from sheet steel
- rear panel manufactured from sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating:

- structure: colour RAL 7035 smooth finish
- rear panel: colour RAL 7035 textured finish
- roof: colour RAL 5020 textured finish.

1 Front panels kit WTCL (2 pieces) to be ordered separately.

EUFI - M side panels, see pag. 114

EUZE modular plinth, see page 58

Modular

CHARACTERISTICS/SUPPLY

The solution is composed by:

- E NUX structure and bottom with adjustable cable entry manufactured from high-strength low-alloy sheet steel
- roof manufactured from sheet steel
- rear panel manufactured from sheet steel
- front door manufactured from sheet steel, with a 4.0 mm thick plexi, complete with a $\varnothing$ 3 mm lever-operated double bar locking system (alternatively, blank door available).

PAINT FINISH

ETA standard epoxy polyester powder coating:

- structure: colour RAL 7035 smooth finish
- rear panel: colour RAL 7035 textured finish
- roof: colour RAL 5020 textured finish.

PROTECTION RATING

- IP55 according to IEC EN62208; EN60529
- NEMA 12 according to UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam
- impact resistance IK10 complying with IEC EN62208; EN62262.

Modular

EUFI side panels, see page 57

EUZE modular plinth, see page 58

MODULAR CABINET WITH MULTIPLE DOORS

FEATURES

- 1 Assembly achievable on the basis of the customer's specification, through the use of ETA standard components and accessories.
- 2 Standard ETA roof, bottom, rear panel and structural uprights.
- 3 Possibility to mount adjacent inner cubicles.
- 4 An independent cable entry for each column, thanks to the rails screwed on the bottom.
- 5 An innovative and simple interlocking mounting system of the cubicles.
- 6 Universal bracket for the fixing of vertical uprights with the possibility to be mounted in an halfway position or at the top.
- 7 Top and bottom panels for the passage of busbars and screwed panel for the passage of cables and terminals.
- 8 Cabinet available in both flat-pack and, on request, in assembled version.

E NUX MULTIPLE DOOR STRUCTURE

CHARACTERISTICS

- structure and bottom without cable entry rail manufactured from high-strength low-alloy sheet steel
- removable roof manufactured from sheet steel
- rear panel manufactured from sheet steel with folded sides.

SUPPLY

Includes roof, bottom, 2 structural uprights and a rear panel complete with 2 structural uprights.
Available assembled or in flat-pack version.

PAINT FINISH

- ETA standard epoxy polyester powder coating.
- structure: colour RAL 7035 smooth finish
 - rear panel: colour RAL 7035 textured finish
 - roof: colour RAL 5020 textured finish.

For different dimensions, please contact the ETA sales office.

PC SOLUTIONS

FEATURES

ETA offer for PC solutions includes PC enclosures with sliding shelf on E NUX structure, assembled or in flat-pack version, with a modular front based on your specific requirements.

The PC cabinet with Pull-out Keyboard is available assembled or in flat-pack version.

ASSEMBLED VERSION

E NUX cabinet structure complete with high-strength low-alloy sheet steel uprights and bottom, roof and rear panel manufactured from sheet steel.

The front section is composed by:

- plexi upper door for monitor vision
- pull-out Keyboard with tilting front, complete with adjustable mouse pad
- sealed section to separate keyboard compartment/ enclosure, complete with: cable gland for keyboard and mouse, bi-adhesive tape for keyboard installation and monitor support
- lower blank front door.

FLAT-PACK VERSION

A pair of high-strength low-alloy sheet steel front uprights. Roof manufactured from sheet steel and high-strength low-alloy sheet steel bottom.

The front section is composed by:

- upper plexi door for monitor vision, upper screwed blank panel or upper hinged blank door.
- pull-out Keyboard or blank panel
- lower hinged blank door.

PAINT FINISH

ETA standard epoxy polyester powder coating:

- structure: colour RAL 7035 smooth finish
- PC front and rear door: colour RAL 7035 textured finish
- roof: colour RAL 5020 textured finish.

PROTECTION RATING

IP55.

Note: monitor support (WTPU000600) to be ordered separately.

Side panels EUFI, see page 57.

Universal plinth EUZE, see page 58.

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

Colour: RAL 7035 textured finish.

SUPPLY

Support complete with mounting accessories.

WHEEL WTRU-001

High quality polyamide wheel. Load capacity 120 kgs for each wheel.

SUPPLY

Includes 4 pieces (2 wheels with brake, 2 rotating wheels).

PC

Rack 19"

E NUX RACK 19" AND NETWORKING SOLUTIONS

FEATURES AND BENEFITS

In full respect of the sustainability and compatibility philosophy, the system of suite cabinets E NUX can be integrated with a range of specific accessories for each solution.

In certain applications, the wide range of 19" components, totally compatible with E NUX, represents the necessary completion of the cabinets:

- full or partial height 19" rack frames with new modular concept
- 19" rack uprights
- rack frames
- fixed or removable shelves
- solid or punched 19" rack panels
- accessories for ventilation
- PDU and further accessories

Rack boxes available.

EFFECTIVE, EASY-TO-INSTALL, STRONG

An innovative system consisting in a new frame, two horizontal rails and trim panels supplied according to the selected assembly: a modular concept to grant flexibility and a wide range of options.

- Higher structural stiffness

HINGES	LOAD CAPACITY (*)
110°	1700 N
180°	1400 N

* Load capacity for single cabinet. For cabinets joined in a suite, the load capacity can be increased by 60%

- Higher resistance to dynamic stress
- Easy to assemble
- No adjustments needed

- Deeper equipment can be installed

KIND OF RACK FRAME		MAX DEPTH OF THE EQUIPMENT 19"mm	
		W=600	W=800
CENTERED	110°	185	370
NOT CENTERED	180°	-	300
CENTERED	110°	-	485
NOT CENTERED	180°	-	415

- New rotating system thanks to the new interchangeable 110° and 180° hinges
- 110° available for W=800mm too
- Partial frames with standard WTPR rails
- Solutions for special applications available (i.e. W=1200mm)
- It can be assembled with dividing panels and EU-KU-003 reinforcing brackets
- New rack stop options (90°, 110°, 135°) for top/bottom assembly

Rack 19"

STEP 1 **Select HE and corresponding rack frame**

STEP 2 **Choose the cabinet width and complete the frame with horizontal rails**

STEP 3 **Select the position (centered or not) corresponding to the cabinet height and add the side trim panels**

STEP 4 **Choose the assembly (full height, top/bottom, intermediate) and complete with the corresponding mounting kit**

STEP 5 **Complete the configuration with further accessories**

Rack 19"

STEP 1

Select HE and corresponding rack frame

SWINGING RACK FRAME EUTR

CHARACTERISTICS

Rack frame manufactured from welded mild steel rails and horizontal profiles.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- rack frame complete with Ø 3mm double bar locking system
- 110° rotating hinges complete with accessories
- closing latches

SWINGING RACK FRAME

EUTR CODE	HE	CABINET HEIGHT

RACK FRAME STTR

CHARACTERISTICS

Rack door and frame manufactured from sheet steel.
Maximum depth of the equipment = 230mm

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

PROTECTION RATING

- external: as box
- internal: IP20.

SUPPLY

- Includes:
- rack frame
 - rack door
 - ø 3mm double bar locking system
 - mounting accessories

Note: see General Catalogue for the complete range of wall-mounted boxes ST (with single blank or plexi door).

BOXES

FEATURES

- 1 Wide range of dimensions: over 40 enclosures with plain door, 19 models with glazed door, enclosures with single plain door, double door with rod locking system and enclosure with single glazed door.
- 2 Mounting plate included.
- 3 Main accessories: plinth, internal door kit and modular chassis, wall-mounting brackets, door stop kit.
- 4 Optional accessories: micro perforated plates, louvered cable entry plates and pole mounting kit.
- 5 Terminal boxes in 5 different versions, with screwed cover, clear cover, for bus system, flanged, with hinged cover.
- 6 Rack enclosures from 3 to 21 units in 450 and 550 mm depths.
- 7 Protection rating for ST boxes: IP66 - Nema 4 (single blank door) Nema 12 (double blank door and plexi door) - IK10.
- 8 High quality epoxy-polyester powder finish. Colour RAL 7035.

CHARACTERISTICS

Enclosure and door manufactured from 1.5 mm thick sheet steel. Mounting plate manufactured from 2.5 mm thick sendzimir sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Enclosure and door: colour RAL 7035 textured finish.

SUPPLY

Box supplied with:

- door provided with locking system with $\varnothing$ 3mm double bar key and 2 zincpassivated rails to be fixed
- mounting plate
- cable entry plate with sealing gasket
- screws for earth connection and mounting accessories.

PROTECTION RATING

- IP66 complying with IEC EN62208; EN62262
- NEMA 4 complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: main accessories to be ordered separately:

- inner door, see page 168
- modular kit, see page 169
- brackets for wall mounting, see page 174.

POLE MOUNTING KIT FPST-001

To fix the box to a pole with round or rectangular section.

CHARACTERISTICS

Rail manufactured from galvanized sheet steel and clamp collar.

SUPPLY

Includes 2 rails and 2 clamps with mounting accessories.

MICROSWITCH WI100ST

CHARACTERISTICS

Complying with standards IEC337-VDE0660. Mounting bracket manufactured from sendzimir sheet steel for a fast-assembly on ST wall-mounting boxes.

SUPPLY

- microswitch
- mounting bracket
- screws

WALL MOUNTING BRACKETS SDWC-010

CHARACTERISTICS

Manufactured from 2.5 mm thick zincpassivated sheet steel.

SUPPLY

Includes 4 pieces.

CABLE ENTRY GLAND PLATE WC - B

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish

SUPPLY

Includes 1 piece with sealing gasket and mounting accessories.

CABLE ENTRY GLAND PLATE

WC CODE	PLATE DIMENSIONS
WC016B	158 x 78
WC018B	258 x 78
WC019B	258 x 128
WC020B	358 x 128
WC022B	558 x 128

LOUVERED CABLE ENTRY PLATES WC - A

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

Includes 1 piece complete with seals and mounting accessories.

LOUVERED CABLE ENTRY PLATES

WC CODE	PLATE DIMENSIONS
WC016A	158 x 78

WC022A	558 x 128

Note: available on request

PUNCHED CABLE ENTRY PLATES WC - FL

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

Includes 1 piece with gasket, screws for FL frame and mounting accessories.

Note: it is available the package with 5 pieces, complete with gaskets, screws for the FL frame and mounting accessories; in this case add suffix "5" to the code (i.e.: WC016FL5).

PUNCHED CABLE ENTRY PLATES			
WC CODE	PLATE DIM.	NO. OF HOLES	HOLE DIM.

MODULAR PLINTH ATZE

CHARACTERISTICS

Corner pieces manufactured from 2.5 mm thick press bent sheet steel, with PVC front covers caps. Front and side crosspieces manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7025 textured finish.

SUPPLY

The modular plinth is made up of:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- front crosspieces: supply includes 2 pieces
- side crosspieces: supply includes 2 pieces.

UNIVERSAL CORNER PIECES	
ATZE CODE	DESCRIPTION
ATZE-A100	CORNER PIECES FOR PLINTH H=100
ATZE-A200	CORNER PIECES FOR PLINTH H=200

Note: supply includes 4 pieces with mounting accessories.

FRONT CROSSPIECES		
ATZE CODE	DESCRIPTION	CROSS. LENGTH MM
ATZE-T0600	PLINTH CROSSPIECES W=600	444
ATZE-T0800	PLINTH CROSSPIECES W=800	644
ATZE-T1000	PLINTH CROSSPIECES W=1000	844
ATZE-T1200	PLINTH CROSSPIECES W=1200	1044

Note: supply includes 2 pieces.

Note: to order the front and side crosspieces H=200, add the suffix "D" to the code. (i.e.: ATZE-T0600D).

SIDE CROSSPIECES FOR SP / STP		
ATZE CODE	DESCRIPTION	CROSS. LENGTH MM
ATZE-T0300S	PLINTH CROSSPIECES D=300	136
ATZE-T0400A	PLINTH CROSSPIECES D=400	236

Note: supply includes 2 pieces.

Note: to order the front and side crosspieces H=200, add the suffix "D" to the code. (i.e.: ATZE-T0300SD).

Control desk

CONTROL DESK SOLUTIONS

FEATURES

Three types of solutions to meet various application needs:

- enclosures with control desk based on E NUX system: with upper and lower door, and an halfway zone for a panel or a front shelf mounting, available assembled or in flat-pack version. This solution proposes the concept of vertical modularity that is typical of E NUX PC solutions: in addition to the E NUX structure, there's the front frame with an height that is contained in 1400 mm to ensure a good visual control of the area that has to be supervised. Available in four widths and in two depths, the range is compatible with the standard accessories of the E NUX system
- modular desks with 400 and 500 mm depth, formed by a series of elements: an AE base, two types of shelf (ME or LE) and an upper part (PE). The flexible use of the components solves the various needs based on usage and final installation
- monobloc desks to be used in easier conditions and for simpler applications: available in two versions – SBA with rear door and an adjustable in depth mounting plate, ZBA with solid rear panel and a mounting plate that is screwed on the inside rear cover – to offer a technical solution, which is always adapted to the needs of the customer.

Control desk

CHARACTERISTICS

E NUX structure and adjustable cable entry bottom manufactured from high-strength low-alloy sheet steel with rear panel with folded sides and removable roof manufactured from sheet steel. Front frame EU-AL and roof with extension manufactured from sheet steel. Upper door manufactured from sheet steel with sendzimir profiles with mechanical stop and $\varnothing 3$ mm double bar locking system. Lower door manufactured from sheet steel with reinforcing profiles, rod mechanism and $\varnothing 3$ mm double bar locking system.

PAINT FINISH

ETA standard epoxy polyester powder coating

- structure: colour RAL 7035 smooth finish
- EUAL front, rear door or panel: colour RAL 7035 textured finish
- roof: colour RAL 5020 textured finish.

SUPPLY

- E NUX structure with rear door or panel (assembled or in kit) and EUAL front frame complete with upper and lower doors
- to complete the configuration of the front, it shall be ordered separately the EUME shelf or the EUPN front panel
- supply includes adhesive gasket and mounting accessories.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN62262
- impact resistance IK10 complying with IEC EN62208; EN62262.

DESK CABINET E NUX

Control desk

SHELF EUME

CHARACTERISTICS

Structure manufactured from 1.5 mm thick sheet steel. Upper panel manufactured from 1.5 mm thick sheet steel with $\varnothing$ 3 mm double bar locking system, sendzimir rails and gas springs to avoid accidental closing.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

Enclosure with:

- upper panel
- sealing gasket
- mounting accessories.

SHELF LE

CHARACTERISTICS

Enclosure manufactured from 1.5 mm press bent sheet steel. Upper panel manufactured from 2.0 mm thick sheet steel with $\varnothing$ 3 mm double bar locking system, sendzimir rails and gas springs to support lid and avoiding accidental closing.

SUPPLY

- enclosure
- upper panel
- rails to mount supplementary mounting plate
- sealing gasket
- mounting accessories.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

PROTECTION

- IP55 complying with IEC EN62208; EN62262
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

UPPER PART PE

CHARACTERISTICS

Structure manufactured from 1.5 mm thick press bent sheet steel. Mounting plate manufactured from 2.5 mm thick zincpassivated rails for mounting plate adjustment. Door manufactured from 2.0 mm thick sheet steel complete with sendzimir vertical rails, mechanical stop and $\varnothing$ 3 mm double bar locking system.

SUPPLY

- enclosure
- front door (for upper part P=500 mm, front door and rear cover)
- mounting plate
- sealing gasket
- mounting accessories.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Enclosure, door and panel: colour RAL 7035 textured finish.

PROTECTION RATING

MODULAR PLINTH EUZE

CHARACTERISTICS

Corner pieces manufactured from 2.5 mm thick press bent sheet steel, with PVC front covers caps. Front and side crosspieces manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

The modular plinth is made up of:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- front/rear crosspieces: supply includes 2 pieces
- side crosspieces: supply includes 2 pieces.

UNIVERSAL CORNER PIECES

EUZE CODE	DESCRIPTION

RESEARCH

Use of silicone seal for the ranges of stainless steel products.

ADDED VALUE

Cabinet E NUX and boxes E COR provided with AISI316L stainless steel hinges. E NUX components: rear panel fixing brackets, side panel fixing brackets, door locking points, everything manufactured from stainless steel AISI316L.

STRENGTH

E COR, E NUX, E MOX and E COMP front door, produced with formed corners.

E NUX structure proposed with the same high-performance constructive concepts of the sheet steel version.

DESIGN

A new locking cover for boxes E COR with a double door, a functional and eye-catching handle used for cabinets: E NUX, E MOX and E COMP.

SUSTAINABILITY

Innovative energy-saving laser technology for high precision welding in order to produce our structure E NUX.

PROTECTION

Boxes E COR, cabinets E NUX and E MOX/E COMP doors manufactured from pre-satinized stainless steel sheet (AISI304L or AISI316L) covered with PVC film for additional protection and provided with new packaging.

FUNCTIONALITY

Front door with a reduced dimension of the door angle, in order to permit the door opening in case of E COR boxes placed side by side. Easy assembly of E NUX suite cabinet thanks to the innovative orthogonal joint.

Stainless steel

EASINESS

Boxes E COR supplied with a mounting plate that is provided with slots in the corner, to allow a simple installation.

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from stainless steel AISI304L (AISI316L on request), closed with continuous welding and free of sharp edges. The bottom is a single piece with box-type structure manufactured from press-bent welded profiles (in stainless steel AISI304L (AISI316L on request), while the frame corners are manufactured with AISI316L stainless steel orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. The union of the entire structure is obtained by 8 high-strength screws and positioning pins between the two parts of the orthogonal joint. Hinges in stainless steel AISI316L.

SUPPLY

- structure manufactured from stainless steel sheet AISI304L (AISI316L on request)
- roof and rear panel manufactured from pre-satinized stainless steel sheet AISI304L (AISI316L on request)
- door with formed corners manufactured from pre-satinized stainless steel sheet AISI304L (AISI316L on request) provided with a stiffening tubular frame, silicone seal and $\varnothing 3$ mm double bar lever-operated locking system
- bottom manufactured from stainless steel sheet AISI304L (AISI316L on request) with modular and adjustable cable entry (double cable entry for $L \geq 1000$ mm) and gasket.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN62262
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: available on request: single door cabinet and suite cabinets, with protection rating IP > 55, NEMA 4X. For more information, see page 62.

Stainless steel

* With side panels mounted, add 12 mm

Note: main accessories to be ordered separately:

- mounting plate EUPA, see page 209
- side panels EUFX, see page 211
- plinth EUZX, see page 212.

Note: available on request: stainless steel modular cabinet E NUX with internal doors and E NUX PC cabinet with sliding shelf.

* With side panels mounted, add 12 mm

Note: main accessories to be ordered separately:

- mounting plate EUPA, see page 209
- side panels EUFX, see page 211
- plinth EUZX, see page 212.

Note: to order a stainless steel enclosure in high grade AISI316L, add the suffix "H" to the code (i.e.: ENUX-121804PRXH).

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from stainless steel AISI304L (AISI316L on request), closed with continuous welding and free of sharp edges. The bottom is a single piece with box-type structure manufactured from press-bent welded profiles (in stainless steel AISI304L (AISI316L on request), while the frame corners are manufactured with AISI316L stainless steel orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. The union of the entire structure is obtained by 8 high-strength screws and positioning pins between the two parts of the orthogonal joint. Hinges in stainless steel AISI316L.

SUPPLY

- structure manufactured from stainless steel sheet AISI304L (AISI316L on request)
- roof and rear panel manufactured from pre-satinized stainless steel sheet AISI304L (AISI316L on request)
- door with formed corners manufactured from pre-satinized stainless steel sheet AISI304L (AISI316L on request) provided with a stiffening tubular frame, Plexiglas, silicone seal and ø 3 mm lever-operated double bar locking system
- bottom manufactured from stainless steel sheet AISI304L (AISI316L on request) with modular and adjustable cable entry (double cable entry for W=1000mm) and gasket.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN62262
- NEMA 12 complying with UL508A; UL50
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Stainless steel

SIDE PANELS EUFX

CHARACTERISTICS

Manufactured from AISI 304L stainless steel sheet (AISI 316L on request) with rounded folding.

SUPPLY

- two side panels
- rapid fasten couplers
- mounting accessories.

Note: to order the side panels for the mounting of 180° hinges, add the suffix "C" to the code (i.e.: EUFX-040180C).

SIDE PANELS		
EUFX CODE	DIMENSIONS	
	HEIGHT	DEPTH
EUFX-040180	1800	400

Note: to order the item in high grade AISI 316L, add the suffix "H" to the code. (i.e.: EUFX-040180H).

INNER DOOR EUPIX

CHARACTERISTICS

Manufactured from AISI304L stainless steel material (AISI 316L on request) and supplied complete with vertical uprights and horizontal rails.

SUPPLY

- door complete with $\varnothing$ 3 mm double bar locking system
- hinges
- vertical uprights and horizontal rails
- mounting accessories.

MODULAR PLINTH EUZX

CHARACTERISTICS

Corner pieces manufactured from AISI 304L stainless steel (AISI 316L on request), with front covers made from stainless steel. Front/side crosspieces manufactured from AISI 304L stainless steel (AISI 316L on request).

SUPPLY

The modular plinth is made up of:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- front/rear crosspieces: supply includes 2 pieces
- side crosspieces: supply includes 2 pieces.

Note: to order the item in high grade AISI316L, add the suffix "H" to the code (i.e. EUZX-T0400H).

Note: to order the plinth H=200, add the suffix D to the code (i.e. EUZX-T0400D).

Note: to order the plinth H=200mm, order 2 packages of front crosspieces (i.e. Plinth H=200 mm dim. 800x500: 1 x EUZX-P0500D + 2 x EUZX-L0800).

PLINTH EUZX

CHARACTERISTICS

Front crosspieces and side crosspieces with integrated corners manufactured from 2.0 mm thick AISI 304L stainless steel (AISI 316L on request).

SUPPLY

The plinth is made up of:

- front crosspieces: supply includes 2 pieces
- side crosspieces with integrated corners: supply includes 2 pieces with mounting screws.

180° CHROME HINGES EUCE-180001C

Supply includes 4 pieces (door requires machining to fit).

LEVELLING FEET WTPX-005X

They can be applied on the cabinet structure or plinth. They make easier for floor cleaning and are height adjustable.

SUPPLY

Includes 4 pieces complete with pin in AISI 304L, plastic base, plate and mounting accessories.

EYEBOLTS M12 WTGS-001X

M12 lifting eyebolts manufactured from stainless steel.

SUPPLY

Includes 4 pieces.

DOOR STOP WTFP-001X

It allows the mechanical stop of the door (90°), preventing the accidental closing.

SUPPLY

Includes 1 piece with mounting accessories.

LIFTING BRACKETS WTSS-001

5 mm zincpassivated sheet steel lifting brackets. Supply includes 4 pieces.

(See page 70 for picture).

JOINING KIT EUKU-002X

To be used to join two cabinets together. It is better to use lifting brackets WTSS-001 instead of lifting eyebolts.

CHARACTERISTICS

Manufactured from stainless steel AISI 316L.

SUPPLY

Includes union spacers, fixing accessories and gasket to guarantee IP protection degree.

(See page 67 for drawing).

REINFORCING BRACKETS EUKU-003

To be used to grant more rigidity to cabinets joined in a suite.

CHARACTERISTICS

Manufactured from 4.0 mm thick zincpassivated sheet steel.

SUPPLY

Includes 4 pieces with mounting accessories.

(See page 66 for drawing).

SHROUD FOR FILTER FANS

Installing a shroud over a filter fan and exhaust filter, the protection degree of the enclosure is maintained.

CHARACTERISTICS

Manufactured from stainless steel AISI 304L.

SUPPLY

Includes 1 piece with mounting accessories.

CONFORMITY AND APPROVAL

PROTECTION RATING

Type 1, 12, 3R with fan or filtering grid.

Note: punched panels to be ordered separately.

SHROUD FOR FILTER FANS

PLAN POCKET

Large size plan manufactured stainless steel sheet.

SUPPLY

Includes 1 piece complete with mounting screws.

PLAN POCKET

WTTS CODE	DOOR WIDTH
WTTS-000600X	600
WTTS-000800X	800
WTTS-001000X	1000

Stainless steel cable glands are available (see pages 257 and 258).

Stainless steel

CHARACTERISTICS

Structure manufactured from 1.5 mm thick AISI304L stainless steel sheet with removable rear panel (AISI 316L on request). Door manufactured from AISI304L stainless steel sheet with stiffening frame (AISI 316L on request). Front inserted mounting plate manufactured from 2.5 mm thick sendzimir sheet steel (for E MOX $W \geq 1000$ mm, EUPA mounting plate 3 mm thick). Hinges in AISI316L stainless steel.

SUPPLY

- cabinet structure with upper aesthetic profiles and rear panel
- door with formed corners complete with $\varnothing 3$ mm lever-operated double bar locking system, silicone seal and tubular stiffening frame
- modular and adjustable cable entry with sealing gasket
- front-inserted mounting plate.

PROTECTION RATING

- IP66 (single blank door), IP55 plexi and double door) complying with IEC EN62208; EN62262
- NEMA 12 complying with UL508A; UL50*
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

* NEMA 4X available on request.

PLINTH EUZX

CHARACTERISTICS

Front crosspieces and side crosspieces with integrated corners manufactured from 2.0 mm thick AISI 304L stainless steel (AISI 316L on request).

SUPPLY

The plinth is made up of:

- front crosspieces: supply includes 2 pieces
- side crosspieces with integrated corners: supply includes 2 pieces with mounting screws.

STAINLESS STEEL

WALL MOUNTING BRACKETS SDWCX-010

Manufactured from AISI 316L stainless steel.

SUPPLY

Includes 4 pieces.

FURTHER ACCESSORIES

- vertical rails, see page 106
- fast-fixing brackets WTPR-R, see page 106
- sliding rails ECPP, see page 106.

CHARACTERISTICS

Enclosure and door with formed corners manufactured from 1.5 mm thick pre-satinized AISI 304L stainless steel sheet (AISI 316L on request). Flat mounting plate manufactured from 2.5 mm thick sendzimir sheet steel with slots in the corners. Hinges in stainless steel.

SUPPLY

Box complete with:

- mounting plate
- door with locking system (box and insert in zinc alloy, lever in stainless steel) with Ø 3mm double bar key
- package with screws for earth connection and mounting plate.

PROTECTION RATING

- IP66 complying with IEC EN62208; EN62262
- NEMA 4X complying with UL508A; UL50
- protection degree guaranteed by the two-component silicone foam seal*
- impact resistance IK10 complying with IEC EN62208; EN62262.

* From size 600x800, box supplied with door rails already mounted.

Stainless steel

Certified:
IMO09 ATEX037U

The requirements of the enclosures that are intended to be used in explosive atmosphere (ATEX) are high: the wide range of ETA boxes fully responds to both the standard required by the directive and the need of the market to have a product for increased safety and with enclosure against dust and gas.

PROTECTION RATING

- IP66 complying with IEC EN62208; EN62262
- NEMA 4 (ST...EE), Nema 4X (E COR...EEX) complying with UL508A; UL50
- protection degree guaranteed by the two-component polyurethane foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

CONFORMITY

- Ex II 2G
- Ex e IIC Gb
- Ex II 2GD
- Ex fb IIIC Db

ETA wall-mounting boxes ...EE are in compliance with the European Directive 2014/34/UE that aims to ensure the free circulation in the EU countries for the products concerned and it is applied to the equipment and protective systems indeed to be used in potentially explosive atmosphere (**ATEX**), for the presence of flammable substances in the form of gases, vapours, mists or dusts.

According to the reference standards EN60079-0; 7 and 60079-31 boxes are “electric enclosures” classified for category **II** and zones **1, 2, 21, 22** for gas and dust (GD) with protection method **EX-e, EX-tb**. Protection methods are based on the idea of prevention; to comply with that the directive establishes a high structural level and restrictive features of equipments and components, and strict periodic tests of process on the approved products UNI EN13980 and ISO 9001.

Includes 4 pieces.

DOOR STOP WA061X

It allows the mechanical stop of the door (90°), preventing the accidental closing.

Supply includes 1 piece with mounting accessories.

Stainless steel cable glands are available (see pages 257 and 258).

CHARACTERISTICS

Boxes and door manufactured from 1.2 mm thick AISI 304L stainless steel sheet (AISI 316L on request). Lid provided with stainless steel captive screws, silicone seal and formed corners for improved aesthetics.

PROTECTION RATING

- IP66 complying with IEC EN62208, EN62262
- IP69K complying with DIN 40050-9
- NEMA 4X complying with UL508A; UL50
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK10 complying with IEC EN62208; EN62262.

Safety and easiness - thanks to the innovative lid fixed with ¼ turns captive screws.

Performance - thanks to the formed corners and the silicone seal.

Eye-catching aesthetics - with new small wall-mounting brackets

STAINLESS STEEL TERMINAL BOXES

E GRAN CODE	BOX DIMENSIONS

SDPA-33	300	300	276	270
SDPA-42	400	200	376	170

CHARACTERISTICS

Structure and lid manufactured from pre-satinized AISI304L stainless steel sheet (AISI316L on request). Lid supplied with silicone gasket, fixed in four points (placed outside the gasket) with captive screw and available in 2 versions: punched for the fixation of push buttons Ø 22.5mm or blank. Wall-mounting from the inner part of the box or from the external part with fixing brackets.

PROTECTION RATING

- IP66 complying with IEC EN62208; EN62262
- IP69K complying with DIN 40050-9
- NEMA 4X complying with UL508A; UL50
- impact resistance IK10 complying with IEC EN62208; EN62262.

Note: to be ordered separately: mounting plate and/or DIN profiles (see page 183).

Note: to order the item in high grade AISI 316L, add the suffix "H" to the code (i.e.: SHX1-109FH).

WALL MOUNTING BRACKETS SHWCX-010

CHARACTERISTICS

Manufactured from AISI316L stainless steel sheet.

SUPPLY

Includes nr. 4 pieces.

CHARACTERISTICS

Enclosure and door manufactured from 1.5 mm thick AISI 304L stainless steel sheet (AISI 316L upon request). Mounting plate manufactured from 2.5 mm thick sendzimir sheet steel. Stainless steel hinges.

SUPPLY

The enclosure is supplied with:

- mounting plate
- door with locking system (box and insert in zinc alloy, lever in stainless steel) with Ø 3mm double bar keyset of screws for grounding and mounting plate assembling
- cable entry plate.

PROTECTION RATING

- IP66 complying with IEC EN62208; EN62262
- NEMA 4X complying with UL508A; UL50
- impact resistance IK10 complying with IEC EN62208; EN62262.

SHELF LEX

CHARACTERISTICS

Structure manufactured from 1.5 mm thick AISI 304L press bent stainless steel sheet. Upper panel manufactured from 2.0 mm thick AISI 304L stainless steel sheet with sendzimir rails and gas springs to support lid and avoid accidental closing. Item in AISI 316L available on request.

SUPPLY

Shelf includes:

- lid complete with $\varnothing$ 3 mm double bar closing system
- rails to mount supplementary mounting plate
- sealing gasket
- mounting accessories.

PROTECTION RATING

IP55.

UPPER PART PEX

CHARACTERISTICS

Structure manufactured from 1.5 mm thick AISI 304L press bent stainless steel sheet. Mounting plate manufactured from 2.5 mm thick sendzimir sheet steel with 2.0 mm zincpassivated rails for mounting plate adjustment. Hinged front panel manufactured from 2.0 mm AISI 304L stainless steel sheet complete with sendzimir vertical rails and mechanical stop. Item in AISI 316L available on request.

SUPPLY

Upper part includes:

- hinged front cover with $\varnothing$ 3 mm double bar locking system
- mounting plate
- sealing gasket
- mounting accessories.

PROTECTION RATING

Stainless steel

OPERATOR PANEL ENCLOSURE

CHARACTERISTICS

Operator housing made from AISI304L satin stainless steel sheet metal with a thickness of 1.5 mm and a ScotchBrite finish, shaped and welded on all sides. Furnished with a solid hinged lid, complete with a panel-stopper, screwed on at the top for easy maintenance. Rounded stainless steel handles, which can be positioned either on the sides, the bottom or the curved sections of the operator housing.

SUPPLY

- Solid operator housing complete with lid and panel-stopper.
- Keyboard support supplied separately.
- Handles supplied separately.

PROTECTION RATING

- IP66 compliant with IEC EN62208; EN60529 (pending).
- IP69K compliant with DIN 40050-9.
- NEMA 4X, compliant with UL508A and UL50 (pending).
- Protection rating ensured by the use of two-component silicone foam.
- Impact resistance rating IK10, compliant with IEC EN62208 and EN62202.

CODE E RAM	OPERATOR HOUSING DIMENSIONS		
	B	A	P
ERAM3-315X	300	300	150

ERAM6-415X	600	400	150

To order the keyboard support, use the part of the housing code that indicates the width and add PTX to the end of the code (i.e. ERAM3-PTX = keyboard support for a 300mm wide E RAM housing).

OPTIONALS

Handle made from AISI304L stainless steel.
Package containing 2 pieces, complete with mounting accessories ERM-02 – L=200.

To order the version in AISI316L, add H to the end of the code (i.e. ERAM3-315XH).

Stainless steel

CHARACTERISTICS

Articulated single-piece support profiles, made from AISI304L stainless steel section with a thickness of 4.00 mm and a satin finish. External diameter 48.30 mm.

SUPPLY

- I, L, J, or S sections (upon request).
- Screws for fastening to the coupling elements supplied together with the relative couplings.

ETA QUALITY, FOR OUTDOOR

Thanks to the specific constructive concept, high quality materials and resistant finishes, the range of outdoor solutions E VIS provides the perfect protection of the framework internal components by environmental factors, extreme temperatures, direct sunlight, harsh environment, vandalism and atmospherical, chemical and mechanical agents.

For these reasons, E VIS product design provides an exceptional protection for your outdoor applications.

BENEFITS

New manufacturing concepts	Innovation
Natural ventilation	Functionality
Resistant materials and finishes for outdoor applications	Strength
Quick assembly and easy wiring	Easiness
Anti-vandalism design and protection of the inner components	Safety

Outdoor

e VIS

SOLUTIONS FOR OUTDOOR APPLICATIONS

FEATURES

- 1 Available in two versions: single-walled or double walled with coverings.
- 2 Available in two materials: steel sheet and aluminium alloy.
- 3 Mild steel version: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (RAL7035 smooth for the cabinet, Pantone 2717U smooth for roof and plinth). Aluminium alloy version: Special painting process with a single polyester powder coating with zinc base (RAL7035 smooth for enclosure, Pantone 2717U smooth for roof and plinth).
- 4 Monobloc cabinets with a vandal-resistant silhouette that is inaccessible when the door is closed.

- 5 Rain canopy screwed on the structure.
- 6 Door provided with a locking system with key and with the possibility to install different inserts or lockable closures.
- 7 Natural ventilation around the monobloc cabinet, due to the "double-walled" system of the side and rear panels, the ventilated roof and the plinth.
- 8 Quick and easy installation wiring, combined with the maximum safety and security.
- 9 It can be equipped internally with ETA standard accessories.

Outdoor

INNOVATION

Innovative product concept.

DESIGN

Thanks to the new design, the side covers are assembled without the aid of screws.

Outdoor

S
U
P
R

FLEXIBILITY

Possibility to design solutions with special dimensions, different finishes, special insulations, silicone seal or completely customised solutions according to customers' requirements.

THERMAL MANAGEMENT

Double-layer front door and ventilation openings on the roof for a simple thermal management of the solution.

FUNCTIONALITY

Only 3 screws to assemble the hinged roof and fix the side covers to the monobloc structure.

STRENGHT AND SAFETY

With the door closed there are no points of access from the outside. Locking system with key.

EASINESS

Large cable entry and quick assembly of the front plinth crosspiece for an easy wiring.

Accessories, see page 250.

Outdoor

Pantone 2717U

IMPROVEMENTS

- Reversible door
- new plinth side crosspieces for an easy mounting
- lifting system with 2 eyebolts
- plate can be recessed flush with the uprigths
- new silicone foam seal supplied as a standard.

CHARACTERISTICS

- Monobloc enclosure, roof, door and rear panel manufactured from aluminium alloy AlMg3 or sheet steel.
- welded monobloc structure with removable rear panel
- roof with ventilation slots and screwed to the monobloc enclosure
- exclusive frontal access with a door provided with a two-component silicone foam seal, 3 points lever-operated locking system and key lock
- 40mm high rain canopy with a 20mm overhang on all sides
- removable and screwed cable entry plates
- available with the double door for L=1200mm
- plinth H=100/200 available with front blank or ventilated crosspieces. *

* Plinth to be ordered separately

PAINT FINISH

- Mild steel version: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (RAL7035 smooth for the cabinet, Pantone 2717U smooth for roof and plinth)
- Aluminium alloy version: Special painting process with a single polyester powder coating with zinc base (RAL7035 smooth for enclosure, Pantone 2717U smooth for roof and plinth).

PROTECTION RATING

- IP56 (single door) and IP55 (double door) complying with IEC EN62208; EN62262
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK 10 complying with IEC EN62208; EN62262.

Note: codes are referring to the single-walled solution manufactured from aluminium alloy. To order the single-walled sheet steel version, replace the suffix "A" with the suffix "M" (i.e.: EVIS060804SM).

Note: further dimensions available upon request.

Outdoor

Accessories, see page 250.

Outdoor

Pantone 2717U

IMPROVEMENTS

- Reversible door
- new plinth side crosspieces for an easy mounting
- lifting system with 2 eyebolts
- plate can be recessed flush with the uprigths
- new silicone foam seal supplied as a standard.

CHARACTERISTICS

Monobloc enclosure, roof, door, rear panel and covers manufactured from aluminium alloy AlMg3 or sheet steel.

- welded monobloc structure with removable rear panel and provided with external covers
- rear and side covers fixed to the monobloc structure without the aid of screws, with a pre-defined mounting sequence and a logical system of joints
- hinged roof with ventilation slots frontally screwed to the frame of the monobloc enclosure
- exclusive frontal access with a double-wall door provided with a two-component silicone foam seal, 3 points lever-operated locking system and key lock
- 40mm high rain canopy with a 20mm overhang on all sides
- removable and screwed cable entry plates
- available with the double door for L=1200mm
- plinth H=100/200 available with front blank or ventilated crosspieces.*

* Plinth to be ordered separately

PAINT FINISH

- Mild steel version: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (RAL7035 smooth for the cabinet, Pantone 2717U smooth for roof and plinth)
- Aluminium alloy version: Special painting process with a single polyester powder coating with zinc base (RAL7035 smooth for enclosure, Pantone 2717U smooth for roof and plinth).

PROTECTION RATING

- IP56 (single door) and IP55 (double door) complying with IEC EN62208; EN62262
- protection degree guaranteed by the two-component silicone foam seal
- impact resistance IK 10 complying with IEC EN62208; EN62262.

MODULAR PLINTH EVZE

CHARACTERISTICS

Front and lateral crosspieces with integrated corners manufactured from aluminium alloy AlMg3 or sheet steel.

PAINT FINISH

Mild steel version: Double layer of special powder coating: epoxypolyester resin primer and second polyester layer with anticorrosion pigments (Pantone 2717U smooth)

Aluminium alloy version: Special painting process with a single polyester powder coating with zinc base (Pantone 2717U smooth).

SUPPLY

The plinth is composed by:

- two lateral blank crosspieces with integrated corners
- two front blank or ventilated crosspieces.

LATERAL CROSSPIECES WITH CORNERS

EVZE CODE	DESCRIPTION	P
EVZE-T0400A	LATERAL CROSSPIECES WITH INTEGRATED CORNERS H=100	410
EVZE-T0500A	LATERAL CROSSPIECES WITH INTEGRATED CORNERS H=100	510

EYEBOLTS WTGS-004

CHARACTERISTICS

Zinc-passivated M12 lifting eyebolts.

SUPPLY

Includes nr. 2 pieces with mounting accessories.

DOOR STOP WTFP-008

Allows the mechanical stop of the door at 95°.

SUPPLY

Includes 1 piece with accessories.

WE LOCKING SYSTEMS

For WE locking systems and inserts that are different from the standard solutions with the key, see page 53.

THERMAL MANAGEMENT

Outdoor applications, that are exposed to different temperature gradients and to a continuous solar irradiation, need a good conditioning to constantly ensure the proper functioning of the electrical and electronic equipment installed.

In order to handle these issues in an appropriate way, in addition to the standard items for ventilation and heating, we offer a choice of specific outdoor conditioners, to be installed inside or outside the cabinet and a wide range of accessories (anti-condensation heaters etc.)

Note: for further information, see Thermal Management section (page 291).

Outdoor

Cable glands for outdoor applications are available (see pages 257 and 258).

EMC SOLUTIONS

The EC Directive on electromagnetic compatibility applies to equipment and units that can generate/ receive electromagnetic waves and liable to cause interferences, altering the correct functioning of electronic equipment installed in the cabinets.

Our products, not being a source of electromagnetic waves, go beyond the dispositions of the Directive, but they can act as a barrier of the electromagnetic waves which propagate from the internal and external source: this allows a significant damping of the electromagnetic field strength (both the electric and the magnetic components of the field) and, as a consequence, of the disturbance that they cause to the equipment.

BENEFITS

Structural features	High protection
Constructive concepts and performing materials	Customer support to comply with the Directive
Variety of solutions, cabinets and boxes	Flexibility
Compliance to the industry standards	Safety

E NUX CABINET

ASSEMBLED CABINET	DIMENSIONS			
	CODE	WIDTH	HEIGHT	DEPTH

	ENUX082006PRZ	800	2000	600
	ENUX062008PRZ	600	2000	800
	ENUX082008PRZ	800	2000	800

Note: further dimensions available on request.

Note: for plexi door version, it is available on request a window manufactured from polycarbonate or methacrylate, with the internal part manufactured from a wire mesh that allows the vision of the internal instrumentation without altering significantly the offered shielding values.

EMC cabinets tested at the Nemko SpA laboratory. For more details, refer to the Technical section on page 327.

CHARACTERISTICS

The profile used for uprights and crosspieces is unique, manufactured from high-strength low-alloy sheet steel, closed with continuous welding and free of sharp edges. The bottom is a single piece with box type structure manufactured from press-bent welded profiles of high-strength low-alloy sheet steel. The frame corners are manufactured in a special steel with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high-strength low-alloy screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

PAINT FINISH

ETA standard epoxy polyester powder coating.

- door and rear panel (external): RAL 7035 textured finish
- roof (external): RAL 5020 textured finish.

ASSEMBLED E NUX CABINET

- structure manufactured from high-strength low-alloy galvanized sheet steel
- door manufactured from sheet steel, galvanized on both sides and painted only externally, with stiffening frame, complete with $\varnothing$ 3 mm lever-operated double bar locking system
- rear panel and removable roof galvanized on both sides and painted only externally
- bottom manufactured from high-strength low-alloy galvanized sheet steel, provided with a single galvanized base plate
- shielding and conductive gasket positioned on the structure and the bottom.

PROTECTION RATING

NEMA 1 complying with UL508, UL50.

SIDE PANELS EUFI

CHARACTERISTICS

Manufactured from sheet steel with folded sides, galvanized on both sides and painted only externally.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

- two side panels
- rapid fasten couplers
- mounting accessories.

Note: further dimensions are available upon request.

For your special projects, we offer a wide range of tested cable glands that have been designed to guarantee safe and performing solutions!

From simplified to complex and harsh applications areas, a specific solution for the cabling is available:

1. Generic industrial business
2. Transportation: high vibrating loads and high levels of chemical pollution
3. Marine industry: specific requirements
4. Electronically-controlled substations: EMC requirements
5. Food industries: anti-bacterial substances for high level of safety
6. Chemical industry and off-shore: potentially explosive atmospheres

STAINLESS STEEL CABLE GLANDS

Material: stainless steel

Seal: TPE for A2; FPM for A4

O-ring: NBR for A2; FPM for A4

Strain relief: Ver. A

Temperature range: -40° / + 100°C for A2; -40° / + 200°C for A4

Protection rating: IP 68 up to 10 bar

STAINLESS STEEL CABLE GLANDS

Long entry thread metric, two-piece sealing insert not overall length insulated

Harsh
environments

CABLE GLANDS FOR EMC APPLICATIONS

This range guarantees full control during installation and compensates for tolerances in shielding thicknesses to make a secure screened tap connection. The spring system provides for a very good contact of partially stripped shielding cables equally as well as for the contact of completely exposed cable shields which can be routed further.

Material: nickel-plated brass
Contact spring: steel 1.4310
Seal: TPE
O-ring: NBR
Strain relief: according to IEC EN 6244, Ver. A
Temperature range: -40° / + 100°C
Protection rating: IP 68 / IP 69K

FURTHER OPTIONS AVAILABLE

CABLE GLANDS FOR FOOD INDUSTRY

Ultra-flat cable glands offering very little surface for contamination; manufactured from stainless steel A2, temperature range -40°/+200° and protection rating IP68. Available with or without EHEDG certification.

CABLE GLANDS FOR OUTDOOR APPLICATIONS

Ultra-flat cable glands inhibiting any manipulation from outside, with no contact surface for interference. Manufactured from nickel-plated brass, temperature range -40°/+100° and protection rating IP68.

CABLE GLANDS FOR POTENTIALLY EXPLOSIVE ATMOSPHERES

Cable glands designed for Ex d IIC and increased safety Ex e II applications; manufactured in nickel-plated brass (stainless steel version available on request), temperature range -60°/+100°, protection rating IP68.

Certificate: EC-Type PTB 10 ATEX 1034X / IECEx PTB 12.0055
Certificate: SEV 15 ATEX 0152X / IECEx SEV 15.0019X

CABLE TRAY SYSTEM

The efficiency and operation of a plant depend on the quality of its constituent elements: in this respect, and in order to deliver a real “complete system”, ETA offers a system of walk-able cable conduits for floor installation.

STURDY construction based on the use of 2.0 mm thick sheet steel for the manufacturing of elements.

SAFETY guaranteed by the 3.0 mm thick checkerplate alloyed aluminium coating, non-slipping and walk-able.

PROTECTION of the cabling system from the conduit and crosspiece front system of the plinth.

MODULAR composition based on elements of different lengths that build up the system and allow to create different combinations.

FLEXIBLE system composition with different modules and connections (star, T-shaped, L-shaped, etc) to meet different installation requirements.

EASY assembling thanks to the element hanging system with quick snap-in mechanism.

Cable tray

PLINTH FRONT CROSSPIECE FOR CABLE CONDUIT EUZE

CHARACTERISTICS

Manufactured from 2.0 mm thick press bent sheet steel.

PAINT FINISH

ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

SUPPLY

One front crosspiece for cable conduit and one blank front crosspiece

- Type 1: a drilled crosspiece for flanges (flanges to be ordered separately, see codes on page 262) and a blank crosspiece
- Type 2: one crosspiece with adjustable flange and one blank crosspiece.

To complete the modular plinth, please order:

- corner pieces: supply includes 4 pieces complete with front covers and mounting hardware
- side crosspieces: supply includes 2 pieces.

Note: to complete the plinth, see page 58.

CONDUIT-PLINTH CONNECTION EUCN200CZ

To simplify the installation of incoming and outgoing cables and the connection of cables inside the cabinet.

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with M6x15 stud and 3.0 mm thick checkerplate alloyed aluminium coating. Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

CONDUIT BASE EUCN

Available in 100 and 200 mm widths, it is delivered in three standard lengths of 500, 1000 and 2000 mm to meet different application requirements (blank, with flanges EUCN - F o for joining with cable bundling EUCN - C).

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with M6x15 stud and 3.0 mm thick checkerplate alloyed aluminium coating. Supply includes one piece with mounting accessories. Conduit base supplied in a single piece, covers manufactured from checkerplate alloyed aluminium coating L= 500 mm.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating. Colour: RAL 5020 textured finish.

EUCN200CF	200	WITH CABLE ENTRY

90-DEGREE WALL FLANGE EUCN200PA

For simplified cable rise to the machine or to the wall.

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with M6x15 stud and 3.0 mm thick checkerplate alloyed aluminium coating. Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

TELESCOPIC ELEMENT

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with M6x15 stud and 3.0 mm thick checkerplate alloyed aluminium coating. Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

TELESCOPIC ELEMENT

EUCN CODE	WIDTH
EUCN200TLA	125-250
EUCN200TLB	250-500

Cable tray

T-JOINT EUCN200RT

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with 2 studs M6x15 and 3.0 mm thick checkerplate alloyed aluminium coating.
Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

STAR JOINT EUCN200RS

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with 2 studs M6x15 and 3.0 mm thick checkerplate alloyed aluminium coating.
Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

90-DEGREE JOINT W=200 EUCN200RA

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with 2 studs M6x15 and 3.0 mm thick checkerplate alloyed aluminium coating.
Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

CABLE BUNDLING W=200 EUCN200CO

To allow the cable exit from the plinth. Punched plinth crosspieces are available upon request.

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel and 3.0 mm thick checkerplate alloyed aluminium coating.
Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.
Colour: RAL 5020 textured finish.

Cable tray

CONDUIT 200/100 REDUCER JOINT EUCN200RC

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with M6x15 stud and 3.0 mm thick checkerplate alloyed aluminium coating.

Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.

Colour: RAL 5020 textured finish.

CABLE BUNDLING W=100 EUCN100CO

To allow the cable exit from the plinth. Punched plinth crosspieces are available upon request.

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel and 3.0 mm thick checkerplate alloyed aluminium coating.

Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.

Colour: RAL 5020 textured finish.

90-DEGREE JOINT W=100 EUCN100RA

CHARACTERISTICS/SUPPLY

Manufactured from 2.0 mm thick sheet steel with 2 studs M6x15 and 3.0 mm thick checkerplate alloyed aluminium coating.

Supply includes one piece with mounting accessories.

PAINT FINISH

Parts manufactured from sheet steel: ETA epoxy polyester powder coating.

Colour: RAL 5020 textured finish.

HOW TO ORDER THE CABLE TRAY SYSTEM

Evaluate the area on the side of the machine that is available for the cable system.

Identify the dimension of the front/rear plinth crosspiece (EUZE-T...CN...) and the type (CN1 or CN2).

I.e. L=EUZE-T0600CN1 – A front crosspiece for each conduit with 1 flange and a rear blank crosspiece.

In case you order type 1, you have to complete the order with one of the three types of closing flanges EUZE-F (flange doesn't change with different plinth width).

Order the conduit-plinth joint EUCN200CZ (which is compatible with any plinth width because the flange opening is the same).

Complete your order by choosing among the alternatives of the conduit base EUCN (available in various length and in 100 mm or 200 mm width) and the standard joints.

Please remind that the standard width of the joints is 200 mm; it is available the conduit 200/100 reducer joint EUCN200RC to join together the conduit base L=100 and the other elements.

SUSPENSION ARM SYSTEM

FEATURES

Bioniq is the pendant system for control interfaces that is presented to combine design and technology. It is designed as a real “system”, manufactured from aluminium alloy and uses its modularity on the three dimensional axes.

- The BQC operator panel enclosure and the BQK keyboard enclosure are customizable in width, height and depth, on the base of the man-machine interface that have to be inserted.

- The BQPA pendant arm system can be composed on the base of the type of application (it can be fixed on the roof, on the wall or on pedestal).
- Wide range of accessories.

Suspension
arm system

CHARACTERISTICS

Structure made from alloyed aluminium with extruded profiles joined by means of die-cast angular pieces.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver).

PROTECTION RATING

NEMA 1 in compliance with UL508A; UL50.

SELECTION

To select the operator panel enclosure, indicate the generic family code, classified according to depth as in the table hereunder, and simply indicate the width and height dimensions. When ordering, also specify if the suspension arm shall be fixed to the roof (T) or bottom (B) of the enclosure or if it is a desk version (P).

WIDTH AND HEIGHT

Thanks to a high degree of customization, you can choose the width (L) and the height (A) of the operator panel on the base of the equipment that have to be inserted.

DEPTH

The enclosure depth must be selected from the base modules with two different depths, as follows:

- small module (S) with useful internal depth of 75 mm
 - big module (B) with useful internal depth of 130 mm.
- The base modules can be expanded with extensions (E) with useful internal depth of 100 mm.

SELECTION PROCEDURE

						W+60 mm	H+60 mm	T/B/P
S	B	Q	C	0	7	5		
B	B	Q	C	1	3	0		
S + E	B	Q	C	1	7	5		
B + E	B	Q	C	2	3	0		
S + 2E	B	Q	C	2	7	5		
B + 2E	B	Q	C	3	3	0		
S + 3E	B	Q	C	3	7	5		
B + 3E	B	Q	C	4	3	0		
S + 4E	B	Q	C	4	7	5		

T = fixing of BQPA pendant arm system on BQC enclosure roof

B = fixing of BQPA pendant arm system on BQC enclosure bottom

P = fixing of BQC enclosure on the desk.

- All dimensions are given in mm
- For dimensions above 999 mm, please contact the ETA sales office
- Complete the configuration with BQBP rear panel, BQWA-003 hinges and BQFR front panel if necessary
- The minimum depth of the BQC operator panel enclosure shall be 130 mm (if the BQPA pendant arm system is used)

CHARACTERISTICS

Structure made from alloyed aluminium with extruded profiles joined by means of die-cast angular pieces.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver).

PROTECTION RATING

NEMA 1 in compliance with UL508A; UL50.

SELECTION

To select the keyboard enclosure, indicate the generic family code, classified according to depth, and indicate the width and height dimensions.

WIDTH AND HEIGHT

Thanks to a high degree of customization, you can choose the width (L) and the height (A) of the operator panel on the base of the equipment that have to be inserted.

DEPTH

The enclosure depth must be selected from the base modules with two different depths, as follows:

- small module (S) with useful internal depth of 75 mm
 - big module (B) with useful internal depth of 130 mm.
- The base modules can be expanded with extensions (E) with useful internal depth of 100 mm.

Note: to be ordered separately the joining profile to the operator panel enclosure BQPU-001 and the rubber sleeve BQM-001 for cable passage (as an alternative to BQPU-001, order the 90-degree connection bracket BQKU-003, see page 275).

SELECTION PROCEDURE

						W+60 mm	H+60 mm
S	B	Q	K	0	7	5	
B	B	Q	K	1	3	0	
S + E	B	Q	K	1	7	5	
B + E	B	Q	K	2	3	0	

- All dimensions are given in mm
- Complete the configuration with BQBP rear panel, BQWA-003 hinges and BQFR front panel if necessary (see page 270)

Note: if required, specify the size of the holes to be drilled in the panel.

Note: fixing kit BQFK-001 for the front panel assembly to be ordered separately.

FRONT PANEL BQFR-001

CHARACTERISTICS

Panel manufactured from 3.0 mm thick sheet aluminium, it can be screwed from outside through special holes.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver).

SUPPLY

Panel complete with mounting accessories.

SELECTION

According to customer specifications, with dimensions given in millimeters, ETA manufactures the drilled front panel and the corresponding operator panel enclosure BQC.

Note: if a hinged panel is required, specify this option in the order and order the BQWA-003 hinges separately (see page 275).

Note: for the desk configuration with direct fixing, order the rear panel BQBP-002.

REAR PANEL BQBP-001 / BQBP-002

CHARACTERISTICS

Panel manufactured from 3.0 mm thick sheet aluminium, it can be screwed from outside through special holes.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver).

SUPPLY

Single panel complete with mounting accessories.

SELECTION

According to customer specifications, with dimensions given in millimeters, ETA manufactures the rear panel.

SEPARATION PROFILE BQPR-001

It allows to divide the operator panel enclosure into two areas and it can be installed vertically and horizontally.

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver).

SUPPLY

Single piece complete with mounting accessories.

SELECTION

The separation profile dimensions match the BQFR front panel dimensions.

SUSPENSION ARM SYSTEM

FEATURES

Bioniq light is the pendant system for control interfaces with a sober and essential design: a flexible system with a high quality/price ratio and fully modular on the three dimensional axes.

- The BQLC operator panel enclosure and the BQLK keyboard enclosure are customizable in width, height and depth, on the base of the man-machine interface that have to be inserted.

- The BQPA pendant arm system can be composed on the base of the type of application (it can be fixed on the roof, on the wall or on pedestal).
- Wide range of accessories.

Suspension
arm system

CHARACTERISTICS

Structure manufactured from anodized aluminium from extruded profiles, joined by means of die-cast and painted angular pieces.

PROTECTION RATING

NEMA 1 in compliance with UL508A; UL5 0.

SELECTION

To select the light operator panel enclosure BQLC, indicate the generic family code, classified according to depth as in the table hereunder, and simply indicate the width and height dimensions. When ordering, also specify if the suspension arm shall be fixed to the roof (T) or bottom (B) of the enclosure or if it is a desk version (P).

WIDTH AND HEIGHT

Thanks to a high degree of customization, you can choose the width (L) and the height (A) of the operator panel on the base of the equipment that have to be inserted.

DEPTH

The enclosure depth must be selected among modules with three different depths:

- small module (S) with useful internal depth of 75 mm
- medium module (M) with useful internal depth of 130 mm
- big module (B) with useful internal depth of 180 mm.

The base modules can be expanded with extensions (E) with useful internal depth of 100 mm.

Note: BQLH handles to be ordered separately (see page 274).

SELECTION PROCEDURE

		W+60 mm	H+60 mm	T/B/P
S	B Q L C 0 7 5			
M	B Q L C 1 3 0			
B	B Q L C 1 8 0			
S + E	B Q L C 1 7 5			
M + E	B Q L C 2 3 0			
B + E	B Q L C 2 8 0			
S + 2E	B Q L C 2 7 5			
M + 2E	B Q L C 3 3 0			
B + 2E	B Q L C 3 8 0			
S + 3E	B Q L C 3 7 5			
M + 3E	B Q L C 4 3 0			
B + 3E	B Q L C 4 8 0			

T = fixing of BQPA pendant arm system on BQLC enclosure roof

B = fixing of BQPA pendant arm system on BQLC enclosure bottom

P = fixing of BQLC enclosure on the desk

- All dimensions are given in mm
- For dimensions above 999 mm, please contact the ETA sales office
- Complete the configuration with BQLBP rear panel, and if needed with BQWA-003 hinges and BQFR front panel if the unit is not fixed directly to the enclosure
- The minimum depth of the BQLC operator panel enclosure shall be 130 mm (if a pendant arm system is used)

CHARACTERISTICS

Structure manufactured from anodized aluminium from extruded profiles, joined by means of die-cast and painted angular pieces.

PROTECTION RATING

NEMA 1 in compliance with UL508A; UL50.

SELECTION

To select the keyboard housing BQLK, indicate the generic family code, classified according to depth as in the table hereunder, and simply indicate the width and height dimensions.

WIDTH AND HEIGHT

Thanks to a high degree of customization, you can chose the width (L) and the height (A) of the operator panel on the base of the equipment that have to be inserted.

DEPTH

The enclosure depth must be selected among modules with two different depths:

- small module (S) with useful internal depth of 75 mm
- medium module (M) with useful internal depth of 130 mm.

In this case, the extension modules cannot be used.

Note: to be ordered separately the joining profile, the operator panel enclosure BQLKU-001, the rubber sleeve BQLM-001 for cable passage and the handles BQLH, see page 274. As an alternative to BQLKU-001, order the 90-degree connection bracket BQLKU-004, see page 275.

SELECTION PROCEDURE

								W+60 mm	H+60 mm
B	Q	L	K	0	7	5			
B	Q	L	K	1	3	0			

- All dimensions are given in mm
- For dimensions above 999 mm, please contact the ETA sales office
- Complete the configuration with BQLBP rear panel, and if needed with BQWA-003 hinges and BQFR front panel if the unit is not fixed directly to the enclosure

FRONT PANEL BQLFR-001

CHARACTERISTICS

Panel manufactured from 3.0 mm thick aluminium sheet, it can be screwed from inside through the studs welded on the panel.

SUPPLY

Includes 1 panel complete with mounting accessories.

Note: fixing kit BQLFK-001 for the front panel assembly to be ordered separately.

SELECTION

According to customer specifications, with dimensions given in millimeters, ETA manufactures the drilled front panel and the corresponding operator panel housing BQLC.

Note: if required, specify the size of the holes to be drilled in the panel.

REAR PANEL BQLBP-001/BQLBP-002

CHARACTERISTICS

Panel manufactured from 3.0 mm thick aluminium sheet, it can be screwed from inside through the studs welded on the panel.

SUPPLY

Includes 1 panel complete with mounting accessories.

SELECTION

According to customer specifications, with dimensions given in millimeters, ETA manufactures the rear panel.

Note: if a hinged panel is required, specify this option in the order and order the BQWA-003 hinges separately.

Note: for the desk configuration with direct fixing, order the rear panel BQLBP-002.

SEPARATION PROFILE BQLPR-001

It allows to divide the operator panel enclosure into two areas; it can be installed vertically and horizontally.

CHARACTERISTICS

Manufactured from 1.5 mm thick sheet steel.

PAINT FINISH

Epoxy polyester powder for aluminium coating (RAL 9006 silver).

SUPPLY

Includes 1 piece complete with mounting accessories.

SELECTION

The separation profile dimensions match the BQLFR front panel dimensions.

BQLH HANDLE

CHARACTERISTICS

Handle made from alloyed steel.

PAINT FINISH

Aluminium (RAL 9006 silver).

SUPPLY

Includes 1 piece with mounting accessories:

- BQLH-001 handle L=150 mm
- BQLH-002 handle L=225 mm
- BQLH-003 handle L=260 mm.
- BQLH-004 handle L=360 mm.

HINGE BQWA-003

It allows to open the rear panel BQPB and BQLBP.

CHARACTERISTICS

Manufactured from alloyed zinc, it opens at 230°.

SUPPLY

Includes 1 piece complete with mounting accessories.

FLANGE FOR FLOPPY DISK DOOR SIEMENS BQFD-002

Flange manufactured from 3.0 mm thick sheet aluminium to contain the Siemens CNC. It allows to lodge the device on the side of the enclosure.

SUPPLY

Includes 1 piece.

CASTOR FOR BIONIQ DESK BQRU-001

CHARACTERISTICS

Support of pressed sheet metal with chrome-plated zinc details; high-quality polyamide castor.

SUPPLY

Includes 1 piece complete with mounting hardware.

FOOT FOR BIONIQ DESK BQPL-001

CHARACTERISTICS

Swivelling foot consisting of a polyamide base and a galvanized steel support.

SUPPLY

Includes 1 piece.

SQUARE-ANGLE CONNECTION BRACKET FOR BIONIQ BQKU-003 FOR BIONIQ LIGHT BQLKU-004

It allows to fix a keyboard to the operator panel enclosure of the bioniq/bioniq light system at 90°.

CHARACTERISTICS

Bracket made from 3.0 mm thick sheet steel.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating RAL 9006.

SUPPLY

Includes 2 pieces complete with mounting hardware.

KEYBOARD SUPPORT FOR BIONIQ BQSK-001 FOR BIONIQ LIGHT BQLSK-001

It allows to fix a keyboard to the operator panel enclosure of the bioniq/bioniq light system.

CHARACTERISTICS

Manufactured from 2.0 mm thick sheet steel.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating RAL 9006.

SUPPLY

Includes 1 piece complete with screws to fix to the enclosure.

Note: when ordering, indicate the keyboard footprint (WxD in mm).

* Height of profile for bioniq light 25 mm, height of profile for bioniq 50 mm

KEYBOARD SHELF WITH MOUSE PAD FOR BIONIQ BQRM-001 FOR BIONIQ LIGHT BQLRM-001

CHARACTERISTICS

Keyboard shelf with mouse pad manufactured from 1.0 mm thick sheet steel, fixing bracket manufactured from 2.0 mm thick sheet steel.

PAINT FINISH

Thermosetting epoxy polyester powder for aluminium coating RAL 9006.

SUPPLY

Includes 1 piece complete with screws to fix to the enclosure.

Note: when ordering, indicate the keyboard footprint (WxD in mm).

LOCKING SYSTEMS

The locking systems for bioniq and bioniq light are conceived for the secure locking of the rear panel.

SUPPLY

Each lock consists of a key, an insert and a block with fixing lever.

LOCKING SYSTEM		
LOCKSET CODE FOR PANEL FIXING BWE	REF.	DESCRIPTION
BWE030	1	LOCK WITH KEY
BWE050	2	FIAT LOCK

BWE278	13	KEY ∇ 8 MM
BWE100	14	SCREW DRIVER INSERT
BWE140	15	LOCK WITHOUT INSERT

The bioniq/bioniq light pendant arm system must be made up according to the type of arm to be assembled, as projection from above or from a wall require a different combination of elements.

CHARACTERISTICS

Tubular structure manufactured from extruded aluminium; other elements made from die-cast pieces.

PAINT FINISH

Section and connection tube painted with thermosetting epoxy polyester powder for aluminium coating (RAL 9006 silver). Rotary turret, enclosure coupling, flanges and angular piece, medium grey painting.

SELECTION

The suspension system is composed of elements (wall flange, turning turret, angular pieces, joints) and customizable modular segments (segment A and final tube T), whose codes are given in the table.

The arm must then be assembled with the operator panel enclosure, and with the keyboard enclosure if available.

LENGTH

The modular sections of the arm (BQAA segment or BQEC tube) are available in fixed lengths (see the table) or can be customized.

Note: the suspension system must be fixed to the base.

SELECTION PROCEDURE

DESCRIPTION	CODE
ROTARY TURRET "11"	B Q R 0 1 1

LOAD DIAGRAM

The basic parameter for the selection of the pendant arm system is the mechanical load it must bear in different situations, which depends on the weight of enclosures and the protruding arm length. The following diagram provides a correct identification of the mechanical load capacity of the pendant arm system, based on its size and the weight of all enclosure and arm components.

Suspension arm system

FIXING SOLUTIONS FOR THE PENDANT ARM SYSTEM

ELEMENTS AND SEGMENTS

WALL MOUNT FLANGE "10" BQF010

Weight: kg. 0.251.

SUPPLY

Includes 1 piece with mounting and fixing accessories.

TOP MOUNTED SWIVEL “11” BQR011

Weight: kg. 1.780.
Rotation 300°.

SUPPLY

Includes 1 piece with mounting accessories.

WALL COUPLING “15” BQR015

Weight: kg. 4.850.

SUPPLY

Includes 1 piece with mounting accessories.

INTERMEDIATE ELBOW “30” BQE030

Weight: kg. 0.630.

SUPPLY

Includes 1 piece with mounting accessories.

Note: To be used whit “T” tube mounted towards the bottom

INTERMEDIATE ELBOW “35” BQE035

Weight: kg. 0.630.

SUPPLY

Includes 1 piece with mounting accessories.

Note: To be used whit “T” tube mounted towards the top

HORIZONTAL ARM “A” BQAA

SUPPLY

Includes 1 piece complete with cover to fix the arm to the top mounted swivel BQR011 and to the intermediate elbow BQE030/BQE035.

HORIZONTAL ARM “A”		
BQAA CODE	LENGTH MM	WEIGHT KG
BQAA0500	500	1.789
BQAA0750	750	2.684
BQAA1000	1000	3.578
BQAA1500	1500	5.367

VERTICAL TUBE “T” BQEC

SUPPLY

Includes 1 piece with mounting accessories.

VERTICAL TUBE “T”		
BQEC CODE	LENGTH MM	WEIGHT KG
BQEC0250	250	0.441
BQEC0500	500	0.883
BQEC0750	750	1.324
BQEC1000	1000	1.765

ENCLOSURE COUPLING FOR BQC "40" BQJ040

Weight: kg. 0.930.
Rotation 300°.

SUPPLY

Includes 1 piece with mounting accessories.

ENCLOSURE COUPLING FOR BST "50" BQJ050

Weight: kg. 0.930.
Rotation 300°.

SUPPLY

Includes 1 piece with mounting accessories.

FIXED FLANGE FOR ENCLOSURE SUPPORT

Weight: kg. 1.066.

SUPPLY

Includes 1 piece with mounting accessories.

ROTATING FLANGE FOR ENCLOSURE
SUPPORT BQFC002

Weight: kg. 1.228.
Rotation 300°.

SUPPLY

Includes 1 piece with mounting accessories.

ADJUSTABLE COUPLING BQGR-001

It allows to orientate the operator panel enclosure optimally.

CHARACTERISTICS

Coupling made from 3.0 mm thick sheet steel with adjustment rings. Neoprene bellows with PVC flanges and locking lever.

PAINT FINISH

Colour: medium grey.

SUPPLY

Includes 1 piece complete with mounting hardware.

PENDANT ARM SYSTEM FOR MEDIUM LOADS

In addition to the suspension system BQPA, ETA is able to provide adequate systems to a large variety of loading needs and cable passing: from the system for medium loads (closed profiles 45/60, 50, 60, 80) to the suspension system B70/90 characterized by an ergonomic design and the ability to obtain various combinations.

LOAD DIAGRAM

The load diagram indicates the maximum load allowed for each size of the pendant arm system. The system dimensions also allow the application of an addition 75 kg load for 5 seconds without any plastic deformation.

The modular system B 70/90, characterized by an advanced design and an incredibly easiness of assembling and cable passing, allows the creation of numerous combinations and the obtaining of multiple system solutions and variations.

The pipes in anodized aluminium, the absence of corners and the junction linearity ensure the system resistance over time, while the modular prosecution of the various coupling with the adapter joints ensure its flexibility.

CHARACTERISTICS

- anodized aluminium pipes
- die-cast aluminium components
- POM bearings
- neoprene seals.

PAINT FINISH

- couplings, supports anthracite gray RAL 7016
- connection pipes: anodized aluminium.

PROTECTION RATING

IP65.

The elegant, innovative and functional design concepts of bioniq are available also in the pedestal system, a solution that allows to fix the operator panel and keyboard enclosure to the pedestal for both standard and light options.

The fixing can be:

- direct (fig. B for the standard option and D for the light option)
- on the profile through a flange (fig. A for the standard option and C for the light option).

CHARACTERISTICS

The pedestal is manufactured from the following materials:

- base of sheet steel
- base cover of thermoformed material colour Pantone 2717U
- pedestal section of extruded aluminium.

SUPPLY

For the composition of the pedestal system, see selection method for:

- operator panel enclosure (BQC or BQLC)
- optional keyboard enclosure (BQK or BQLK)
- pedestal base BQBA-001 (with feet) or BQBA-002 (with wheels) and pedestal section BQSU (see page 286).

Note: for applications as the ones showed in pictures A and C, order separately the pedestal flange BQFC-002.

Note: for application as the ones showed in pictures B and D, order separately the flange BQF010 and the adapter panel BQBP-002 or BQLBP-002 (see page 286).

BIONIQ LIGHT PEDESTAL SYSTEM

Note: dimensions of the height do not include castors or feet (for these components see the drawings on page 276).

Suspension
arm system

BIONIQ LIGHT PEDESTAL SYSTEM

fig. C

fig. D

Note: dimensions of the height do not include castors or feet (for these components see the drawings below).

PEDESTAL BASE BQBA

The base for bioniq on pedestal is available in two alternative versions:

- desk base complete with 3 levelling feet without front panel.
- desk base complete with 3 castors and front panel.

DESK BASE BQBA

BQBA CODE	DESCRIPTION
BQBA-001	DESK BASE FOR PEDESTAL WITH FEET
BQBA-002	DESK BASE FOR PEDESTAL WITH CASTORS

Note: to replace 1 foot order 1 BQBL-001 (see page 275); to replace 1 wheel without block order 1 BQRU-001 (see page 275); to replace 1 wheel with block order 1 BQRU-002.

PEDESTAL SECTION BQSU

The bioniq pedestal section is available in two different heights.

PEDESTAL SECTION BQSU

BQSU CODE	HEIGHT FROM BASE TO KEYBOARD ENCLOSURE
BQSU-001	1000
BQSU-002	1100

Note: supports with different heights available upon request. For fixing as shown in Fig. A/C, complete the order with the desk flange BQFC (see page 280). Instead, for direct fixing as shown in Fig. B/D, order the adapter panel BQBP-002 and the corresponding flange BQF010 (see page 278).

REAR PANEL FOR SECTION FIXING BQBP-002/BQLBP-002

The rear panel, properly drilled, allows to fix the pedestal section directly to the enclosure (as shown in Fig. B/D).

REAR PANEL BQBP/BQLBP

BQBP/BQLBP CODE	DESCRIPTION
BQBP-002	REAR PANEL FOR DIRECT FIXING ON BIONIQ
BQLBP-002	REAR PANEL FOR DIRECT FIXING ON BIONIQ LIGHT

Note: for more information about the panel, please check on page 270 and 274.

Note: complete the order with the corresponding flange BQF010 (check on page 278).

PEDESTAL FLANGE BQFC

Designed to guide cables from the support to the operator panel enclosure BQC, it is made from cast aluminium.

fig. 1

fig. 2

Note: for product codes and further technical details, check on page 280.

Sol. 1

Sol. 2

Sol. 3

Sol. 4

The operator interface housing based on ST is designed to meet the requirements of convenience combined with easy use.

Four solutions are available:

- simple enclosure with handles fixed on the door (Sol. 1)
- simple enclosure with handles fixed on the enclosure structure (Sol. 2)
- simple enclosure with optional application of the BQFR front panel on the door (Sol. 3)
- simple enclosure with optional application of the BQFR front panel on the enclosure structure (Sol. 4).

CHARACTERISTICS

Enclosure and door manufactured from 1.5 mm thick sheet steel. The upper part of the enclosure is provided with a hole to fix the pendant arm system.

SUPPLY

Housing supplied with:

- enclosure and door complete with $\varnothing$ 3 mm double bar locking system
- two handles complete with mounting accessories
- mounting screws.

PAINT FINISH

Epoxy polyester powder coating.

Enclosure and door: colour RAL 7035 textured finish.

Handle colour: gun barrel grey.

PROTECTION RATING

- IP55 complying with IEC EN62208; EN62262.
- NEMA 1 complying with UL508A; UL50.

Note: mounting plate available on request profile BSTPROF200 (supply includes nr. 4 pieces) for BST mounting plate to be ordered separately.

SOLUTION 4

LOCKING SYSTEMS

See page 172.

DOOR STOP WA060

See page 170.

BLANK PLATE BQB001

CHARACTERISTICS

Manufactured from sheet steel. Designed to close the punching dedicated to BQPA pendant arm system on BST housing.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

Includes nr. 1 piece with mounting accessories

ADAPTING PLATE BQB002

CHARACTERISTICS

Manufactured from sheet steel. Designed to assemble the pendant arm system for medium loads and the pendant arm system B 70/90 to BST housing.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 7035 textured finish.

SUPPLY

Includes nr. 1 piece with mounting accessories

Note: please require the punching on the housing.

THERMAL MANAGEMENT

The electronic components contained in cabinets require adequate measures against dust, pollutants and high temperatures. Providing an adequate cabinet conditioning or air circulation permit to optimize costs and time, thus granting the optimal functioning of the equipment.

Ethermo is the ETA complete range of items for the thermal management of the cabinets:

- compact and ultra-thin conditioners (for wall applications, roof applications and joined cabinets)
- air conditioners for outdoor applications
- air-to-water and air-to-air heat exchangers
- climate control doors
- fans and filter grids "click and fit"
- ventilation hoods
- anti-condensation heaters, controllers and thermostats.

AIR CONDITIONERS

- Designed to ensure the best working conditions for electrical and electronic equipment
- Suitable for applications requiring a Temperature set point below ambient Temperature
- Several Mounting configurations for all the applications
- Range from 300 to 10000 W (L35L35)
- Several Power Supply available (see product data sheet)
- High protection degree from cabinet side (IP54)
- Certifications CE (UL on most of the models)
- Maintenance Free
- Functioning up to +55°C
- Refrigerant Gas R134a

INDOOR

- Wall-mounting (WICD)
- For joined cabinets (WICE)
- Extra-slim (WIDC)
- Roof-mounting (WICT)

OUTDOOR

- (WICA)

HEAT EXCHANGERS

- For proper working favourable conditions are needed (roughly 10°C)
- Range from 16 to 160 W/K air-air; from 870 to 25000 W air/water
- Several Power Supply available
- High Protection degree cabinet side (IP55)
- CE and UL certification
- Wall mounting (internal or external)
- Maintenance free

INDOOR

- Air-to-air (WISC)
- Air-to-water (WISW)

VENTILATION

The ventilation systems are an easy and economical solution for the Temperature management of the electronic enclosures. These system are the perfect solution when is possible to use the external air (if not too dirty) for the cooling, the heat load is not too high and the enclosure can work with a ΔT of 10-15°C.

- Fans and filters (WT)
- EMC fans and filters (WIEM)
- Roof mounting fans
- Exhaust fan (WT)

AIR FILTER

BAFFLE

SEMI OR TOTALLY RECESSED MOUNTING FRAME

IP55 GASKET

SPECIAL COLOUR

STAINLESS STEEL VERSION IN AISI304 OR AISI316

* Check the templates for further details

TECHNICAL FEATURES

- Air conditioners for wall and door mounting
- Cooling capacity: 360-5600W
- Digital thermostat XCB
- Condensate dissipating device from WICD11...
- µchannel condenser (from WICD11...)
- General Alarm contacts and remote control standard (except WICD38...)

TECHNICAL FEATURES

- Air conditioners for suite cabinets
- Available in two sizes (600 or 800mm width)
- Cooling capacity from 5800W to 10000W
- Digital thermostat ECB

AIR CONDITIONERS FOR SUITE CABINETS

WICE10040CW	10000 W	400-3-50 / 460-3-60	800	2000	384

AIR DUCT

For suite cabinets, we propose an air duct manufactured from press bent sheet steel.

PAINT FINISH

ETA standard epoxy polyester powder coating.
Colour: RAL 5020.

SUPPLY

Modular element based on the dimensions of the joined cabinets, including punching on the roof and adjustment of the air flow.

Note: available on request.

TECHNICAL FEATURES

- Slim air conditioners suitable for door mounting
- Designed for total recessed mounting
- External installation with accessories supplied separately
- Available in 3 sizes
- Cooling capacity from 500 to 3000W
- Digital thermostat ECB
- Integrated filter
- µchannel condenser
- Condensate dissipating device from WIDC-14...
- Control phase module on three-phase models as standard

OPTIONAL

- Frame for external mounting (see following page for assembly instructions)

Thermal

TECHNICAL FEATURES

- Air Flow 37-831 m³/h
- Reversible air flow, push/pull (except WT315B – WT315VB)*
- Easy maintenance and filter substitution

CHARACTERISTICS

Grids and supports manufactured from thermoplastic material:

- heat resistance (-35°C +80°C)
- IEC/DIN 53480 KA 3 sliding currents resistance
- colour similar to RAL 7035
- sealing gasket to guarantee IP54

Filtering panel manufactured from mixed polyester-modacrylic fibres:

- high filtering capacity
- max working temperature 130°C
- easily removed
- good reutilization.

FAN SIZING

- The diagram shows how to choose the ventilation units.
- Select the heat to be dissipated on the Y axis, the intersection point obtained on the required ΔT line gives the necessary air flow on the X-axis.

PROTECTION RATING

- IP54
- NEMA 12 complying with UL508A; UL50.

* WT315B and WT315VB available in pull version as standard; for push version, please contact the ETA sales team.

Example:

$P = 500 \text{ Watt}$, $\Delta T = 20^\circ\text{C}$, $V = 80 \text{ m}^3/\text{h}$

A WI 205 fan with $V = 97 \text{ m}^3/\text{h}$ is required

Formula

$V = 3.1 P$

ΔT

where:

V = air flow m^3/h

P = dissipated power Watt

$\Delta T = (T_i - T_e)$

T_e = external temperature $^\circ\text{C}$

T_i = temperature requested inside the cabinet $^\circ\text{C}$

These ventilation systems ensure protection from electromagnetic interference through the combined use of a special paint and a metal net on the conductive sealing grid.

TECHNICAL FEATURES

- screwless
- designed in ABS BLEND (RAL 7035)
- air flow 35 – 990 m³/h
- reversible air flow, push/pull
- easy maintenance and filter substitution
- electrical connections with springs terminals
- MBTF: 40000 hours.

PROTECTION RATING

IP54 (IP55 available on request).

Dimensions vary according to the product codes, see below

TEMPERATURE REGULATOR WI280

TECHNICAL FEATURES

Voltage: 230 V AC
Adjustment range: +5 +60°C
Contact capacity:
• close 5A/250 V AC
• open 10A/250 V AC
Connections 2,5 mm² 4 poles
Fixing: clip fixing on 35 mm DIN rails
Housing: UL 94 V0 thermoplastic material
Dimensions: 67 x 50 x 38 mm.

PROTECTION RATING

IP20.

ELECTRONIC TEMPERATURE/HUMIDITY CONTROLLER WI290

TECHNICAL FEATURES

Voltage: 100 – 240 V AC
Temperature regulation: 0° ÷ 60°C
Intervention sensitivity: + 2°C
Respective humidity regulation: 50% ÷ 90%
Response time: about 5 sec
Contact capacity: Max: 240 V 10 A
ON indicator: LED
Fixing: clip fixing on 35 mm DIN rail
Dimensions: 60 x 77 x 43 mm
Housing: UL 94 V0 thermoplastic material.

PROTECTION RATING

IP20

* Available upon request: 120V version

TECHNICAL FEATURES

Adjustment range: $0^{\circ} \div 60^{\circ}\text{C}$
 Sensitive element: Bimetallic
 Intervention sensitivity: $+ 2^{\circ}\text{C}$
 Maximum opening capacity: 250 V AC, 10 (2) A / 120 V AC, 15 A
 Working life: > 100.000 cycles
 Connections: $2,5 \text{ mm}^2$, 2 poles
 Fixing: clip fixing on 35 mm DIN rails
 Dimensions: 60 x 33 x 43 mm.

PROTECTION RATING

IP20.

THERMOSTAT WITH OPENING CONTACT NC W1282

When the temperature increases there's the contact opening. To be used to control air temperature inside cabinets:

- heating
- ventilation
- signal transmissions.

THERMOSTAT WITH CLOSING CONTACT NO W1284

When the temperature increases there's the contact closing. To be used to control air temperature inside cabinets:

- heating
- ventilation
- signal transmissions.

THERMOSTAT WI286

Two thermostats in one casing:

- thermostat (contact breaker, normally closed) for regulation heaters
- thermostat (contact breaker, normally open) for regulation filter fans and heat exchangers or switching signal devices when temperature limit has been exceeded.

TECHNICAL FEATURES

Adjustment range (NC – NO): $0^{\circ} \div 60^{\circ}\text{C}$

Maximum opening capacity: 250 V AC, 10 (2) A / 120 V AC, 10 (2) A – DC 30 W

Working life: > 100.000 cycles

Connections: 2,5 mm², 4 poles

Fixing: clip fixing on 35 mm DIN rails

Housing: UL 94 V0 thermoplastic material

Dimensions: 50 x 67 x 46 mm.

PROTECTION RATING

IP20.

MULTIPLIES THE EXPERIENCE

TECHNICAL SECTION

PRACTICAL GUIDANCE ON THE GENERAL SAFETY REQUIREMENTS FOR ENCLOSURES AND SWITCHGEAR AND CONTROLGEAR ASSEMBLIES

In an electrical panel (assembly) the following parts can be distinguished: an ENCLOSURE (support and protection of components housed inside it) and ELECTRICAL EQUIPMENT (devices, connections and terminals).

- **Primary distribution boards (Power Center – PC):** generally installed in the substation downstream of the MV/LV transformers or generators. Primary distribution boards have a high design current and short circuit withstand capability. The Power Center board represents the first level of LV distribution and includes one or more input units, bar connectors and is generally divided into functional units.
- **Secondary distribution boards:** the design current and short circuit withstand capability are lower than those of Power Centers. They represent the second level of energy distribution and include a wide category of assemblies.
- **Motor control center – MCC:** designed for the centralised control and protection of motors, they include the related switching and protection equipment and the auxiliary control and signalling equipment. Unlike the Power Center, each compartment does not contain just one switch/device, but all of the protection, control and signalling components intended for the control of each motor.
- **Control, measurement and protection boards:** they mainly contain equipment designed for the command, control and measurement of industrial plants and processes.
- **On board assemblies:** similar to those above from a functional point of view, these allow the machine to interface with the power supply source and with the operator.

All of these components must be designed and assembled to meet the safety requirements and be suitable for the specific physical ENVIRONMENT and OPERATING conditions of its intended use.

The assemblies are constructed in according to best practices if they comply with the requirements described in the product standards:

- EN61439 part 1 and part 2
- EN60204 part 1
- EN62208

harmonised, i.e. recognised, by European Directives:

- LV Dir.: 2006/95/EC
- MV Boards Dir.: 2006/95/EC
- EMC Dir.: 2004/108/EC
- ATEX Dir.: 94/9/EC .

The operating conditions are specified in terms of:

- 1 Corrosive agents, atmospheric agents (corrosion resistance)
- 2 Solar radiation (resistance to UV rays)
- 3 Strength of materials (lifting, IK mechanical impact, short circuit)
- 4 IP protection rating
- 5 Electromagnetic sources (EMC compatibility)
- 6 Over-temperatures and condensation
- 7 Presence of gas, dust and mists that can create potentially explosive atmospheres (ATEX).

INSTALLATION ENVIRONMENTS

As required by the EN 62208 standard, ETA specifies that the enclosures are designed to be installed indoors, under the normal conditions indicated below. For outdoor applications, the installer must specify whether the conditions are normal or special. If this information is not provided, the normal service conditions for indoor installations will always be assumed.

The enclosures compliant with the EN 62208 standard are intended to be utilized under the following conditions.

INSTALLATION UNDER NORMAL CONDITIONS			
		INDOOR	OUTDOOR
TEMPERATURE	Upper ambient air temperature limit	+40°	+40°
	Lower ambient air temperature limit	-5°	-5°
	Average temperature value in relation to a 24H period	+35°	+35°
HUMIDITY	Relative humidity (moderate condensation may occasionally form due to temperature changes)	The humidity level must not exceed 50% at a maximum temperature of +40°C. A higher relative humidity level is permitted at lower temperatures (e.g. 90% at +20°C)	It may temporarily reach 100% at a maximum temperature of +25°C

INSTALLATION UNDER SPECIAL CONDITIONS

If one of the following special conditions is present, the special requirements to be applied must be agreed between the user and the manufacturer:

- Special ambient air temperature and humidity
- Presence of corrosive substances
- Presence of specific dusts (coal, cement, etc.)
- Unusual mechanical stresses (seismic, etc.)
- Presence of flora, fauna, or mould
- Ionizing influences
- Electromagnetic interference
- Vibrations
- UV radiation, other than solar radiation.

TRANSPORT AND STORAGE CONDITIONS

A special agreement must be made between the enclosure's manufacturer and the user if the transport, storage and installation conditions (e.g. the temperature and humidity conditions) deviate from those indicated under the "Normal conditions".

CE MARKING (FOR THE EUROPEAN MARKET)

The manufacturer (or the party bearing responsibility for the wired assembly) is required to affix a clearly visible plate during installation and operation of the assembly. The enclosure, in turn, must be identified by a plate or marking that permits the manufacturer of the assembly to obtain information on the type of enclosure and the manufacturer. The manufacturer's plate may be inserted inside it and should not be confused with the plate for the wired assembly. ETA products are equipped with internal marking indicating the trademark, model and the logos of the third party certification bodies. CE Marking, compulsory for the EU market, is the "visual sign of conformity of a product to the requirements of applicable directives". The other certifications represent voluntary and responsible compliance to the minimum requirements of product standards.

LIFTING CRITERIA

The test was carried out according to EN62208 for static and dynamic lifting in order to guarantee the description below. If the lifting is from above, using ropes in good condition and of the proper size for lifting. The units must be hooked with lifting eyebolts, with brackets or, in case of batteries, with lifting crosspieces as instructed below. In case of lifting with a forklift or pallet truck, take care to lift with the forks properly spaced.

E MOX - E COMP - E VIS

90°

The angle at the rope junction must be 90°

The loads inside the cabinet are intended as equally distributed throughout the volume

E NUX

The angle at the rope junction must not exceed 60°

The loads inside the cabinet are intended as equally distributed throughout the volume

DEGREE OF PROTECTION IP (EN60529 / DIN 40050-9)

Protection against direct contact with live parts of the assembly must be guaranteed. The enclosure is designed to ensure protection of equipment against specific external influences and protection in all directions from direct contact, with a protection rating of at least IP2X. Protection against indirect contacts (i.e. protection against faults) is achieved using insulation. The enclosure manufacturer guarantees the protection rating of its product as sold, i.e. empty. The assembly manufacturer is responsible for the definition of the protection rating of the complete and finished assembly (through testing or through design verification analysis). Where an empty enclosure in accordance with EN62208 is used, and no external modification has been made that may result in deterioration of the protection rating, no further testing is required.

Note: the openings made for cable entries and/or for installing the devices, may lower the protection rating: therefore, it is important that the holes are made according to best practices and that seals are used to ensure, by the manufacturer, that the initial conditions are maintained, where possible. If this is not possible, the protection rating of the enclosure must be downgraded (it cannot be less than IP2X).

It is important to keep in mind that the higher the protection rating, the greater the reduction in value of natural power dissipation from the enclosure (see paragraph).

The degree of protection IP is essentially defined by two characteristic numerals (EN60529):

IP 1ST DIGIT = SOLID		IP 2ND DIGIT = LIQUID/GAS	
0	 No protection	0	 No protection
1	 Protection against solid bodies above 50 mm (E.G. Involuntary hand contact)	1	 Protection against vertically falling water drops
2	 Protection against solid bodies above 12 mm (e.G. Finger)	2	 Protection against water drops falling with up to 15° inclination
3	 Protection against solid bodies above 2.5 mm (tools, wires)	3	 Protection against water splashes from all directions
4	 Protection against solid bodies above 1 mm (thin tools, thin threads)	4	 Protection against water splashes from all directions
5	 Protection against dust (no noxious deposits)	5	 Protection against jets of water from all directions
6	 Total tightness to dust	6	 Protection against water splashes similar to sea waves
 IP69K (according to DIN 40050-9) Rating for high-pressure, high-temperature wash-down applications. A spray nozzle fed with 80 °C water at 80–100 bar and a flow rate of 14–16 L/min.		7	 Protection against immersion
		8	 Protection against submersion

IP SEALS

Generally, the enclosure has a seal applied around the perimeter of all closing panels (doors, side panels, rear panels, covers).

POLYURETHANE SEAL

HF1 fire resistance (as per standard UL94).

Optimal environmental conditions for use: temperature: $-40^{\circ}\text{C} < T < 100^{\circ}\text{C}$.

EMC GASKETS

Made of 3 parts: an EPDM core (ensuring the protection rating), a metal fabric coating (that ensures dielectric continuity between the structure and panels) and non-woven double-sided tape, very tough and applied on one side (ensuring adherence and resistance)

Optimal environmental conditions for use: temperature: $-40^{\circ}\text{C} < T < 100^{\circ}\text{C}$.

SILICONE GASKET

Used on the new ranges of stainless steel ETA products, it is resistant to most detergents, hot water jets and is easy to clean.

Optimal environmental conditions for use: temperature: $-50^{\circ}\text{C} < T < 200^{\circ}\text{C}$.

IK RATING (ACCORDING TO EN62262)

Indicates the level of protection provided by the enclosure to the equipment against harmful external mechanical impacts (including vandalism). The test is carried out by applying impact energy, as outlined below: after the test, there must be no failure or deformation likely to compromise the IP rating.

All ETA products are marked with the maximum rating IK10 = maximum resistance corresponding to the impact of a 5 kg object thrown from a distance of 40 cm.

IK CODE	IK00	IK01	IK02	IK03	IK04	IK05	IK06	IK07	IK08	IK09	IK10
Impact energy Joule	0,00	0,14	0,20	0,35	0,50	0,70	1,00	2,00	5,00	10,00	20,00

NEMA (TYPE)

For Canada and America, the protection degree is defined as NEMA or TYPE and it also indicates the type of use (indoor and outdoor), not only protection from solids and liquids.

NEMA TYPE	NEMA National Electric Manufacturers Association (NEMA 250) Ed Eemac Electrical and Electronic Manufacturers Association Of Canada UI Underwriters Laboratories, Inc.	
1	Indoor use	Protection of contact with internal equipment.
4	Indoor and outdoor use	Protection against rain, snow and wind-blown dust, sprayed and direct water, and damage due to external icing
12	Indoor use	Protection against dust, falling dirt and non-corrosive dripping fluids.
3R	Outdoor use	Protection against heavy rain and light snow. It prevents ice formation on the inside.
4X	Indoor and outdoor use	Protection against corrosion, wind-blown dust, rain, water sprays and water jets from hoses. It prevents ice formation on the inside.

EARTH CONNECTION (CONTINUITY OF THE PROTECTIVE CIRCUIT)

The electrical panel (assembly), consisting of an enclosure with equipment and connection conductors, to provide protection against indirect contacts, must have the exposed conductive parts earthed by means of a protective circuit.

A suitable sized conductor is required for earthing any accessible parts of the enclosure where the devices are installed or for any part that could become live under fault conditions (e.g. insulation fault of a cable etc.). However, if no equipment is installed, the contact made with screws and metal hinges between the structure and assembly is sufficient for achieving equipotential bonding. All external metal parts that are not likely to come into contact with internal live parts, or that cannot be touched, do not need to be earthed.

The ETA product range includes earthing materials (screws, nuts and washers) and the instructions for correct installation. The E NUX cabinet fully meets all earthing requirements: its structure can be used as a conductor, as long as the screws that comprise the load bearing structure are properly tightened using the toothed lock washer, that will cut into the paint and therefore create electrical continuity between the welded joint on the upright and the welded portion of the crosspieces. The assembly manufacturer can connect the panels to the structure electrically, then the structure to the main protective bonding circuit, and the latter to the earthing system. In this way all of the exposed conductive part of the enclosure, identified as such by the assembly manufacturer, will be earthed and equipotential to each other. The measurement methods used are those specified in clause 9.11 of standard IEC EN62208.

SHORT CIRCUIT

The short circuit withstand rating, specified by the original manufacturer of the assembly, must be verified by application of design rules, calculation or testing.

The assembly must be manufactured to withstand thermal or dynamic stress up to the established short circuit values.

The ETA suite cabinet system with ETA tested busbar system and supports is complying with 61439-1-2.

SURFACE TREATMENTS

For INDOOR applications (generally in environments classified as C1, C2 according to EN12944), it is advisable to choose standard dust and standard cycle as the dust is resistant to mineral oils, lubricants, emulsions and cleaning products with low acid content and diluted in concentrations of less than 5%. In presence of particularly harsh chemical substances, the E.T.A. technical staff is available to evaluate the possibility of an ad hoc solution.

For OUTDOOR applications (generally in environments classified as C3), environmental factors (ice, snow, rain, sun, wind, humidity) need to be considered in order to select an assembly with an appropriate IP protection rating (installing a protective roof, if necessary). Polyester powders are recommended for products installed outdoors, because they are very resistant to UV rays. In average corrosion and humidity conditions, anticorrosive zinc-based powder is a valid solution. For environment with high salinity and high levels of pollution (generally areas in the C4 category: industrial areas and coastal areas, or C5: chemical petrochemical industries, marine environments, offshore), we recommend using zinc plated steel coated with special powders for outdoor use or polished stainless steel and, if necessary, painted.

For INDOOR and OUTDOOR applications (food, chemical, petrochemical industries) requiring a high degree of hygiene and/or resistance to chemical and environmental agents, ETA recommends its AISI 304L and AISI 316L stainless steel products. Stainless steel materials are alloys of iron, chrome and carbon, enriched with other elements such as nickel, molybdenum, silicon, titanium, etc. They stand out for their high resistance to corrosive attacks from external factors. This characteristic is determined by the spontaneous formation of a thin layer of chromium oxide on the stainless steel surface, which protects the metal below from corrosive attacks and from the presence of other elements, such as nickel, molybdenum, titanium, etc. This layer, very stable and tough, prevents direct contact between the surrounding atmosphere and the steel. Unlike conventional protection coatings (zinc-plating, painting, etc.) it has the capacity to restore itself after accidental breaks, making the material intrinsically resistant to corrosion. There are different degrees of stainlessness or, in other words, a scale of nobility, determined by the chemical composition. The steel selected by ETA is austenitic AISI 304L and 316L, where the L stands for low carbon, which makes the steel even more resistant to corrosion. The presence of elements such as Chrome Nickel and Molybdenum improve the intrinsic characteristics of stainless steel. The durability of the product subject to salt spray and condensation atmosphere testing depends on:

- sheet type
- production process
- wash cycle
- painting
- powder used

Ageing depends on the different environmental conditions that the installed product is subject to.

Quality: 100% visual inspections.

Periodical E.T.A. in-house laboratory tests of the process on painted samples:

- visual inspection of the surfaces
- thickness testing
- adhesion testing (ISO 2409)
- film adherence test: piercing and bending
- salt spray test as per ISO 9227
- resistance to humidity test as per ISO 6270.

OVERTEMPERATURE AND CONDENSATION (DUE TO EXPOSURE TO LOW TEMPERATURES)

In environments where the walls reach, on their inner surface, temperatures below the dew point temperature of ambient air, the phenomenon of surface condensation occurs, resulting in the accumulation, on the surfaces of the walls, of a quantity of water that cannot be contained in the air in the form of vapour. Surface condensation is closely related to the internal surface temperature of the wall and therefore depends on, not only the temperature and relative humidity of the ambient air, but also the amount of insulation offered by the wall itself. Generally, surface condensation is closely related to the degree of thermal insulation provided by the wall, since, for an ambient with given thermo-hygrometric characteristics (air temperature and humidity), condensation depends on the temperature where the internal face of the wall is located.

To prevent surface condensation phenomenon, one only needs to keep the internal temperature of the walls above the dew point temperature of ambient air, and therefore check that: $t_{pi} > t_R$

The value of dew point temperature t_R can be obtained from the Mollier diagram for moist air (where the ambient air temperature and its relative humidity are known), while to calculate the surface temperature it is necessary to estimate the heat balance of the wall (refer to Software QuadroPlan).

Note: if the maximum surface temperature is insufficient to prevent condensation, an anti-condensation space heater can be used to maintain the indoor air – and therefore the surface air – at the desired temperature. To size the heater, the cabinet (or enclosure) open surface must be determined on the X-axis, the intersection point on the ΔT oblique line indicates the necessary thermal power on Y-axis.

Formula:

$$P = K \times S \times \Delta T$$

where:

P = dissipated thermal power [Watt]

K = heat dissipation coefficient for the enclosure material (for painted sheet steel $K=5.5$ [W/m²°C])

S = open cabinet surface [m²]

$\Delta T = (T_i - T_e)$

T_i = desired internal temperature

T_e = external temperature [°C].

Adding appropriate thicknesses of insulation materials helps to prevent surface condensation phenomenon because insulation raises the surface temperature of the wall to above the dew point temperature.

SEISMIC DESIGN

Seismic design starts from the seismic vulnerability assessment of the structure located in different geographical scales; the project refers to two activities carried out during the consultancy between the Eucentre Foundation in Pavia, TREES Lab (Laboratory for Training and Research in Earthquake Engineering and Seismology) and ETA.

MODELLING AND NUMERICAL SIMULATION

In the first task of mathematical simulation, the analysis is based on the increasing values of acceleration PGA from 0.35g to 1.5g, where PGA stands for Peak Ground Acceleration (measure of earthquake acceleration on the ground). The PGA of a site is expressed as acceleration on hard ground, and that is to say net of any amplification effects due to the different soil beneath the structure; the spectra considered were applied separately in both the x and y direction.

SIMULATION ON A SHAKE TABLE

For the second simulation activity on a shake table, the known earthquake spectra was used, which are considered as representative. The recorded values of acceleration, displacement and velocity of various seismic events were applied to the 2 prototypes in order to achieve maximum accuracy. The two prototypes were tested both parallel and perpendicular to the direction of displacement (x,y). After the first test, the samples were carefully inspected to check that there were no structural failures. The subsequent tests were conducted by increasing the values of each spectra by up to 1.5% and then repeating the check on the structures (hinges, screws, fasteners). The technical solutions offered by ETA are the result of the combination of the two research activities (modelling and numerical simulation and simulation on a shake table). To make the right choice, we recommend that you check the seismic data available at the installation site and consult page of our catalogue on page 68.

TEMPERATURE RISE IN ASSEMBLIES

An electrical panel (assembly) is a system made up of a fluid (air) and of solid bodies including devices which, due to the Joule effect, current passes through and heats them up. The evolution towards thermal equilibrium involves the transfer of heat from live parts (devices, conductors ...) to the parts in contact with the devices and from these to the surrounding environment.

Heat transfer takes place by means of:

- conduction (transfer of heat inside solid bodies)
- radiation (transfer of heat between solid bodies separated by a medium)
- convection (transfer of heat between a solid body and a moving fluid).

The temperature inside the assembly increases until it establishes at a T_i value that differs from the external temperature T_e . IEC EN60439-1 lays down the temperature rise limits which must not be exceeded in certain points of the assembly. Verification can be done using the calculation procedure provided in standard CEI 17/43. In principle, this method is applied to enclosures for which the following assumptions apply:

- 1 even distribution of dissipated power;
- 2 devices arranged in a way that does not impede air circulation;
- 3 no more than three horizontal separation
- 4 The data required for the calculation are: dimensions of the enclosure, the power dissipated in the enclosure (devices, conductors) and the type of installation (insulated assembly, or insulated at one end...).

Note: QuadroPlan software – available online for download – allows you to calculate the power dissipated by the surfaces and offers an over-temperature calculation module; furthermore, dissipation tables of the sheet used for ETA products are available in the reserved area at www.eta.it.

prontoquadro

The QuadroPlan software, which is available online, allows the user to calculate the power that can be dissipated from the surfaces, and offers a tool for checking the temperature rise limits according to table 6 of the IEC EN 61439-1 Standard.

Indoor calculation: temperature rise calculation according to CEI 17.43 (IEC 60890). The calculation is based on the cabinet's natural dissipation, without taking any ventilation/cooling/heating options into account. These options are only proposed during the final stage in order to meet all the user's requirements.

Outdoor calculation or calculation subject to external factors: this calculation is carried out for applications in environments where the temperature is affected by the power installed inside the panel, as well as by external energy factors (e.g. sunlight). It is based on a physical model designed according to the basic principles governing thermal exchanges of a convective and radiative type, and using a lumped-parameter mathematical model.

SEPARATION

The inside of an electrical panel (assembly) can be separated using barriers or partitions, metallic or non metallic, to obtain conditions that limit the contact of live parts of the single functional units (switches).

Such separation must:

- Ensure safe access to parts cut off from the power supply, in relation to live parts (IPXXB)
- Reduce the probability of propagation of an internal arc
- Prevent the passage of foreign bodies between internal live parts (IP2X)

The separation criteria and various modalities are covered in EN61439-2, which considers 7 different forms of separation using barriers or partitions, starting from no internal separation (assembly with no internal barriers between the various functional units and/or busbars) up to form 4b of separation (i.e. the functional units are separated from the input busbars, output terminals and from one another).

Note: the functional unit is part of a device (assembly) comprising all the electrical and mechanical elements that contribute to the fulfilment of the same function. E.g. input/output switches, measurement unit, engine control unit etc.

By using ETA enclosures and structures it is possible to make all forms of separation provided in the standard.

Note: when the verification of the temperature rise is carried out through calculations, if the project is designed with more than 3 separations, the calculation according to standard CEI 17/43, which the QuadroPlan software program is based on, no longer applies. Furthermore, the greater forms of separation serve in very special cases, which require maintenance or operations ensuring the safety and continuity of service, i.e. to permit access to equipment cut off from the power supply in relation to those nearby.

FUNCTIONAL UNIT

LEGEND

- a. Enclosure
- b. Internal separation
- c. Functional Units, including terminals for associated external wires
- d. Bars, including distribution bars

FORM 1

No internal separation

FORM 2

Separation of busbars from the functional units

FORM 2A

Terminals not separated from the busbars

FORM 3

Separation of the busbars from the functional units, plus separation of the functional units from one another

FORM 3A

Terminals not separated from the busbars

FORM 4

Separation of the busbars from the functional units, plus separation of the functional units from one another, plus separation of the terminals from one another

FORM 4A

Terminals in the same compartment as an integral part of the functional unit

FORM 2B

Terminals separated from the busbars

FORM 3B

Terminals for external conductors separated from busbars

FORM 4B

Terminals for external conductors not in the same compartment as the associated functional unit

APPLICATIONS IN EXPLOSIVE ATMOSPHERES AND TYPES OF PROTECTION FOR LV AND ON-BOARD ASSEMBLIES (DIRECTIVE 94/9/EC/ATEX)

The ATEX directive for explosive atmospheres applies to electrical and mechanical equipment and protective systems for use in Potentially explosive atmospheres, i.e. work environments where there is dust, gas and mists which in certain conditions (temperature, concentration and source of ignition) can cause an explosion.

In accordance with the Directive, the installers must, in particular:

- know the classification of the work areas and their extension, provided by the end user, who has the obligation to carry out a risk assessment in the work environments
- design and implement safety measures for the equipment from both an electrical and mechanical standpoint, based on where it will be installed (this determines the need to use suitable components).

If the end user has confirmed the presence of an explosion risk in the workplace and therefore has classified the work areas (as required by Directive 99/92/EC and also Legislative Decree 81/08, the end user must implement prevention procedures to minimise the risk of explosion (e.g. adjusting the temperature or concentration of the potential sources) or select appropriate protection systems to minimise the effects of a potential explosion.

We would like to remind you that three elements are required for an explosion to occur: fuel + oxygen + ignition source (heat). By inhibiting or eliminating just one of the 3 elements you can reduce the risk:

Containment: the explosion is contained within specific enclosures that do not allow its propagation to the external environment.

Prevention: the reliability of the electrical components is increased so that no sparks are generated and hazardous temperatures are reached during normal use. Example: limiting the heat (increased safety and construction safety).

Segregation: the live electrical parts or hot surfaces are physically separated from the explosive mixture, so that there is never any contact with the source of ignition. Example: removing the fuel (pressurisation, liquid immersion, encapsulation).

EX STRUCTURE THAT CAN BE USED BASED ON THE CLASSIFICATION OF ZONES

HAZARDOUS AREA	ZONE	PRESENCE EXPLOSIVE MIXTURE	MARKING ON EQUIPMENT	TYPES OF PROTECTION ALLOWED										
				ia	d	 e (PROTECTION) INCREASED SAFETY*	ib	m	o	q	p	n	 tD (PROTECTION) BY ENCLOSURE AGAINST DUST AND GAS**	
Presence of gas, vapour or mist	0	Continuously or for long periods	II 1G	●	-	-	-	-	-	-	-	-		
	1	Occasionally	II 2G	●	●	●	●	●	●	●	●	-		
	2	Only for faults or very short periods	II 3G	●	●	●	●	●	●	●	●	●		
Presence of dust	20	Continuously or for long periods	II 1D										●	
	21	Occasionally	II 2D										●	
	22	Only for faults or very short periods	II 3D										●	

(*) Equipment that does not produce arcs, sparks or dangerous temperatures during normal operation (non sparking construction). Additional protection measures are applied, in order to provide increased safety with a higher safety factor, which must prevent the formation of arcs/sparks or the possibility of temperatures that could ignite the explosive mixture; this is made possible by a general oversizing of both insulating materials and the active electrical parts with respect to electrical constructions of normal industrial productions, which are already non-incendive.

(**) Dust ingress protection and surface temperature limitation. The electrical components that could ignite an explosive atmosphere, high temperatures, sparks, etc. are housed in enclosures with a degree of protection IP6X; in zone 22 with non-conductive dust, degree of protection IP5X is permitted. Moreover, the external surface temperature of the equipment is kept lower than the maximum surface temperature.

The selection criteria are different depending on whether the equipment is intended for gas or for dust. If gas is present, the surface temperature of the electrical equipment must not be greater than the ignition temperature of the hazardous substance present (temperature classes from T1 to T6). If dust is present, the minimum ignition temperature is defined for a layer with a thickness of 5 mm (chart) for each type of dust. The maximum surface temperature (T) of the equipment must not exceed the lower value between $T_{max} = (2/3) T_{ignition}$ and $T_{max} = T_{5mm} - 75$ (where 75 K = safety margin).

THE MECHANICAL STRENGTH OF THE MATERIALS (STEEL AND ALLOYS) USED FOR THE PRODUCTS

LOW-CARBON STEEL	HSLA HIGH-STRENGTH LOW-ALLOY STEEL	STAINLESS STEEL	ALUMINIUM ALLOY
Suitable for all types of cold forming and heat-mechanical treatments. To increase chemical resistance it is subjected to surface treatments	Excellent for all types of cold forming and heat-mechanical treatments. Perfect for structural support elements	Insensitivity to low temperatures, high fire resistance, greater mechanical strength. Hygiene, sturdiness, UV ray resistance, conductivity for earthing. High corrosion resistance. Weather resistance, UV rays stability	High corrosion resistance, high thermal and electrical, excellent ductility and malleability, low radiant power
Surface treatment GALVANIZING PAINTING	Surface treatment GALVANIZING PAINTING	Surface treatment 2B + Scotch Brite® finish + Protective PVC cover PAINTING (optional)	Surface treatment ANODIZING PAINTING

Re is the minimum yield strength of steel
As long as the service stresses do not exceed this value, the element stressed by the action returns to the initial state at the end of the action.

Rm is the tensile strength at break
This data is not directly used in calculating the strength of metal building material. This characteristic is taken into account, in particular, to determine the fatigue strength of the metal elements subjected to cyclic loads.

e nux

High-yield strength steel HSLA260, widely used in the automotive industry and selected for manufacturing the E NUX cabinet structure, offers a higher degree of mechanical strength compared to traditional steels and is particularly suited for structures subject to stress and strain or shock. The guarantee of minimum yield value already at the time of supply (i.e. higher yield and greater tensile strength), makes it possible to act on the thickness of the material, while maintaining the mechanical properties and structural safety, ensuring high levels of performance.

STATIC AND DYNAMIC LIFTING TEST

EMC - ELECTROMAGNETIC COMPATIBILITY (DIRECTIVE 2014/30/UE)

The “Electromagnetic compatibility” Directive concerns components that emit electromagnetic (EM) waves. Our products - as they are not EM wave sources - are not subject to the above EMC Directive, however they can provide a barrier for the EM waves that propagate from internal and external sources. This allows a significant reduction of the intensity of these EM waves and, accordingly, the disturbance that they cause to equipment installed within the assembly. The standard cabinet made of painted steel is able to provide an average attenuation of EM waves taking advantage of its conductivity characteristics and, in addition, through the equipotential earthing of the different components (plate, panels, door, structure).

In particular, the EMC cabinet, thanks to its unique structural characteristics listed below, can SIGNIFICANTLY reduce the intensity of the electromagnetic field in the electric and the magnetic component, and thus provide appropriate support to the customer in complying with the Electromagnetic Compatibility Directive.

EMC testing is not required when:

- the assembly does not contain electrical equipment
- the installed electronic equipment is CE-marked.

Stainless steel cabinets can also effectively reduce electromagnetic waves.

The tests on the EMC version of ETA products are conducted at the NEMKO laboratory complying with EN61000-5-7.

Cabinet E NUX (EMC vs. standard)

ST wall mounting boxes (EMC vs. standard)

SD terminal boxes (EMC vs. standard)

Legend for charts:

- 1 Refer to a range of frequencies used (shown on the horizontal axis).
- 2 Read the corresponding attenuation range on the vertical axis. This value in decibels represents the difference of the field value without a barrier (free field) and with a barrier.
