DESCRIPTION

Assistance Call Button for Accessible Restrooms

The CALL-ONE is a call button with a pull cord, designed to expand the CALL-HELP call kit with additional call points. It complies with the regulations of the Technical Building Code CTE – DB SUA 3.1.2, ensuring intuitive and effective use in public service facilities. Its compact and functional design allows for seamless integration into any environment, providing a reliable and secure solution for users with reduced mobility.

Efficient Connectivity and Intuitive Design

Exclusive FONESTAR Design: The kit has been designed with ease of use in mind, featuring an intuitive and attractive design that fits into any setting.

Easy Installation and Adaptability: Designed for universal square and round boxes, it offers simple installation and compatibility with various infrastructures.

Why Choose CALL-ONE?

The CALL-ONE call button with pull cord is the ideal solution for expanding the CALL-HELP call kit. It provides security and confidence to both users and facility managers, delivering an intuitive and effective call system. Its clear signaling and robust design make it the best choice for accessible restrooms in public areas such as hospitals, shopping centers, nursing homes, gyms, and more.
